## Army Names 28 For Lieutenant Colonel, Lists Promotions To Major And Captain

The Army has named 28 majors for temporary promotion to lieutenant colonel in S.O. 185, with effective date of rank from 16 September.

Also released this week were lists of temporary promotions to major and captain, found on Pages 4, 13, 14 and 19.

The cutoff date for the promotions to lieutenant colonel was 3 March 1951.

The promotions to lieutenant colonel included two MC majors, Thomas B. Hauschild and Harold C. Murphree, and two MSC majors, Gilbert L. East and Charles D. Graber, as well as the following line majors:

Aston, David T., Arm	Clark, Wm J., jr, Inf
Boardman, Chas H 3d,	Creigh, Carl W, OrdC
CmIC	DeCharleroy, A L, Inf
Buchholz, O T, jr, Inf	Erickson, J D, Arty
Campbell, M L, CmIC	Fossum, A C, Inf

## Advancements To Major On Upswing; Marine Corps Picks 244 For Oak Leaves

Promotions to major in the Marine Corps took an upward turn as the Fiscal Year 1959 selection board chose 244 captains—81 more than were named by last year's board—for gold oak leaves.

The Fiscal Year 1957 board picked 231 and the Fiscal Year 1956 board tapped 204. The year before that, 1,668 were selected for major.

This year's selection list is comprised of 213 Unrestricted (including three active duty Reservists), 25 Limited Duty and six Supply Duty officers.

There were 180 Unrestricted officers in the 264-man promotion zone which extended from Capt. Orville D. Cooney, Lineal No. 220, through Capt. Robert H. Krider, Lineal No. 545, in the 1 Jan. 1958 Combined List. The selection rate for Unrestricted officers is 68.2%, a rise of 6% over last year. The board, headed by Brig. Gen. Lewis J. Fields, Marine Corps Liaison Officer, Office of the Vice CNO,

passed over 85 captains for the first time. In addition to the 180 Unrestricted captains picked from within the zone, the board reached above the zone to name 30 out of 44 who were eligible.

Six of seven Supply officers in the zone—85.7%—were chosen along with one from above the zone.

A separate zone of 28 LDO's, extending from Maj. Eugene H. Lindfelt, No. 9, through Capt. Harry N. McCutcheon, No. 36, shown on page 198 of the Combined Lineal List, was considered. The board named 22 of the LDO's in the promotion zone—a selection rate of 75%. At the same time, all three LDO's eligible from above the zone were chosen.

A total of three Unrestricted active duty Reservists were named for gold leaves. The lone Reservist named from two in the zone is Zane E. Sprague. Two

## Stripes And Titles Certain To Confuse

DIVERSE approaches used to create new rank insignia and titles resulting from the addition of the super pay-grades, E-9 and E-8, to enlisted rank structures, could make it difficult to tell the players without a scorecard. There is little uniformity in either the titles or insignia chosen by the Services to designate the nine pay-grades.

Pay-grade E-9 carries five different titles. In the Air Force, an E-9, known as Chief Master Sergeant, wears eight stripes; his counterparts in the Marine Corps, both Sergeants Major and Master Gunnery Sergeants, wear seven stripes; in the Army, a Sergeant Major (E-9) wears six stripes. An Army Specialist Nine wears

## RIF Threat Eased As SecDef McElroy Discloses Delay In Manpower Cuts

The threat of new officer force-outs in the Armed Forces as a result of projected manpower cuts has been removed—at least temporarily.

Secretary of Defense Neil H. McElroy, in response to a question from a JOURNAL reporter, told a news conference late last week that the situation in the Far East required that military strength be maintained at present levels for the time being.

Secretary McElroy remarked that Congress had appropriated funds for an Army of 900,000 and a Marine Corps of 200,000, compared with 870,000 and 175,000 asked by the Administration.

The Secretary said "we are not making any rapid move early in the fiscal year to get to the end strengths which

were named in the fiscal year budget." Fears had been expressed during recent weeks that manpower reduction plans would require some or all of the Services to institute new "RIF" action.

The fact of the matter is that during the first month of fiscal '59 manpower strength showed an increase.

Newly released Defense Department statistics show that at the beginning of August, the Services had a strength of 2,605,858, an increase of 5,277 from the end of fiscal '58 on 30 June.

The Army's latest strength was reported at 898,580; Navy, 644,710; Air Force, 871,630; and Marine Corps, 190,938.

## Navy Promotion System Under Scrutiny; Army-Air Force Experts Aid New Study

Army and Air Force "witnesses," at the invitation of a sister Service, have been appearing before an unpublicized top-level Navy "jury" which is considering the fate of the Navy's highly-touted promotion system.

What the verdict will be remains to be seen? At the moment, the Navy is willing to disclose scant details concerning the study.

In response to an inquiry, the Navy declined even to give the names of the 10 members of the board.

The new Navy promotion study was launched in the wake of Congressional failure to take legislative action which would alleviate an ugly "hump" situation on the officer promotion list.

As was reported in last week's issue, the "hump" problem has been eased to

some extent by the issuance of two emergency Executive Orders by President Eisenhower.

THE JOURNAL has learned that VAdm. H. Paige Smith, USN, Chief of the Bureau of Personnel and Deputy Chief of Naval Operations for Personnel, activated the board last month to make a sweeping study of the Navy's promotion system, including a comparative analysis with the systems used by the Army and Air Force.

The board is headed by RAdm. Ira E. Hobbs, USN, Assistant Chief of Naval Operations for Personnel.

The board has been meeting twice weekly and has heard presentations from Army and Air Force personnel planners.

## Army General's Board Meets 23 Sept.; Air Force Selections Set For October

AN Army selection board convenes 23 September to choose officers for temporary major general and permanent brigadier general.

The zone of consideration for temporary two-star rank includes all brigadier generals on active duty.

For permanent brigadier general, the zone includes permanent RA colonels to and including Joseph R. Walton, PL No. 1228 in the 1958 Army Register.

Last week's issue of THE JOURNAL told details of forthcoming general officer selections in the Air Force. A board meets 27 October to name Air Force officers for permanent and temporary promotion to major general and brigadier general.

## Army Aviation Leader Tells Prospect For Added Punch To Pentomic Divisions

The striking power and mobility of Army Pentomic divisions can be bolstered by the addition of an organic Aerial Combat Reconnaissance Company.

This is the view of Maj. Gen. Bogardus S. Cairns, USA, who commands the Army Aviation Center at Ft. Rucker, Ala., where the only ACRU of its kind—a test unit—is blazing new trails in combat mobility.

Speaking 17 September to the Aviation Writers Association at the National Press Club in Washington, D. C., General Cairns was asked if experiments with the Aerial Combat Reconnaissance Company pointed to its use with the Pentomic divisions.

"I would hope so," he replied. General Cairns revealed that the Ft. Rucker Center has proposed to the Continental Army Command at Ft. Monroe, Va., that the basic company-sized aerial unit be expanded.

Although he was not specific about the type of unit that has been recommended for the future, General Cairns at one point mentioned the feasibility of Aerial Combat Reconnaissance squadrons or brigades.

A one-time Cavalry officer who then served brilliantly with Armor units, General Cairns won his wings in 1957.

At Rucker, tests have been conducted with an ACRU that is made up of 13 light helicopters, four troop carrier heli-

## Army Ranger Students In 8-Week Course Get Plenty Of Rugged Work, Little Sleep

(The following article, "The Modern American Ranger," was prepared for publication in THE JOURNAL by Col. John T. Corley, Infantry, USA, Director of the Ranger Department of the Infantry School, Ft. Benning, Ga.)

THERE is a new breed of Rangers in the American Army—the young company grade officer and the professional non-commissioned officer who entered the Army after Korea. The Rangers of World War II received their training at the British Commando Schools and in turn passed it on to their newly organized units prior to entry into combat.

The modern day Ranger receives his training at the United States Army Infantry School. In an eight weeks course of instruction he is developed into a superb Infantry soldier of exceptional endurance who is skilled in techniques of field craft and survival, and in mountain, jungle, air-landed and amphibious operations. The course is designed to combat-condition the student to hazards of weather and terrain equalling and often exceeding those encountered in actual combat.

General J. Lawton Collins, then Army Chief of Staff, initiated the current Ranger course of instruction in late 1951. The goal was to train a Ranger-qualified officer for each rifle company and one noncommissioned officer for each Infantry platoon. Additional emphasis was given to the program when Gen. Maxwell D. Taylor, present Chief of Staff, made Ranger and/or Airborne training mandatory for all newly commissioned Regular Army officers.

Some 6,000 men have enrolled in the Ranger course. Of this number, approximately 4,000 are qualified to wear the Ranger tab. The Ranger course is a tough one. All students are volunteers. They must attain a minimum score of 225 points on the Army physical test and must be capable of swimming at least 50 feet before they are eligible for enrollment.

The course is subdivided into three phases. A preparatory phase of two weeks physically hardens the student and reviews basic skills of soldiering. From the time of reporting to completion of the course the student is forced to adhere to rigid standards of discipline. All students are addressed as "Ranger" and are expected to be alert and responsive to orders.

Following the preparatory phase at Fort Benning, the Ranger student goes to the Ranger Jungle and Amphibious Camp at Eglin Air Force Base, Florida for three weeks of training in amphibious jungle and air-landed operations. This is followed by another three weeks of mountain training in the Chattahoochee National Forest near the Tennessee Valley Divide in the Blue Ridge Mountains. Here the student learns the art of rappelling and other basic mountain techniques.

In Florida and the mountains, the student is exposed to sixteen basic problems, three air-landed and three amphibious. The patrol is employed as the teaching medium and varies in size from a six man reconnaissance patrol to a company-size raiding party. The problems themselves vary in extent from a few thousand yards to 50 miles,

Colonel Corley

and in time from a few hours to 84 hours. The remaining problems, closely observed by a Ranger officer or non-commissioned officer, require the student to operate over seemingly impassable terrain. At times he is hungry, and always he is tired. The Ranger student seldom averages more than five hours sleep per night during his training in Florida and in the mountains. In eight weeks of training the Ranger student receives 818 hours of instruction.

Training is realistic, rough and to a degree hazardous—the closest approach to combat conditions that can be achieved in a peacetime Army. The number and variety of situations faced by the student equal those which a soldier would gain in two or three campaigns in battle. In brief, the Ranger course is a combat conditioning program in which the student is exposed to situations which closely approximate and often exceed those he will encounter in combat. Fatigue, hunger, the necessity for quick, sound decisions and the requirement of demonstrating calm, forceful leadership under conditions of stress are all encountered within the Ranger course. Here an individual simply known as "Ranger Price" must impose his personality and will on others in order to direct and guide their efforts toward the accomplishment of the assigned mission. He operates mostly at night under adverse conditions of weather and terrain; the physical condition of his men at times approaches near exhaustion. The student is constantly harassed by an Aggressor enemy which forces him into unexpected situations which call for prompt, valid decisions.

After every patrol, Ranger students are critiqued by the Ranger lane observer who accompanies each patrol. It is here that the student has an opportunity for self-evaluation and analysis. Through training such as this, a small unit leader is developed who is mentally and physically capable of sustained action on the atomic battlefield of the future and who will continue to exert his influence regardless of time, place or circumstances, whatever the unit to which he is assigned.

Many of the Ranger lane observers are young Ranger-qualified officers who completed the same course three or four years earlier, and have performed duty with troops prior to returning as Ranger

instructors. The Ranger imprint is upon these instructors and because of them the quality of the product of the Ranger course continues to improve. New ideas are constantly introduced into the course as the means become available for extending the capabilities of the modern American Ranger.

The present day Ranger is far better trained than his predecessor. He has developed a confidence in his own ability at night over varied terrain under conditions of stress and fatigue. He has incorporated new techniques into his methods of operation. Like his predecessor, he is an expert in field craft and patrol techniques. The modern American Ranger is second to no other soldier.

COLONEL CORLEY is a USMA '38 graduate. In WW II he was one of the most decorated Battalion Commanders in the First Infantry Division. In Korea, as a Battalion and Regimental Commander in the Twenty-fifth Infantry Division, he added clusters to his DSC, LM and SS. He wears eight Silver Stars.

WELL STARRED. While Brig. Gen. Walter A. Huntsberry looks on approvingly, Mrs. Huntsberry reflects her happiness as she pins the silver star on his shoulder during a ceremony honoring his promotion from the rank of colonel, held in Gen. Huntsberry's office at the Brooklyn Army Terminal. Gen. Huntsberry is Chief of the U. S. Army Overseas Supply Agency at the Terminal.

## Travel Second Class To Save Funds, Secretary Jackson Suggests To Navy

Assistant Secretary of the Navy for Financial Management Richard Jackson "suggests" to Navy travelers that they give up their "first class" travel entitlement for less expensive passage, in order to save Government funds.

Although "regulations provide that individuals traveling under orders are entitled to first-class transportation and that this entitlement shall not be abrogated," the Secretary points out that "modern carriers provide excellent coach service over most routes, and this should be brought to the attention of all travelers."

The Secretary said that in many instances scheduling and routing of coach travel is more convenient. "It is believed," he said, "that in many cases coach-class transportation would satisfactorily meet the requirements and that in the interest of effecting savings, the travelers would voluntarily accept this class of accommodations if aware of it."

Secretary Jackson told all ships and stations that the Navy is "continually under Congressional pressure to reduce expenditures in this area, and as a result, in past years, insufficient money has been appropriated to support the travel performed. Consequently, each year the strength of the Navy has suffered because of excessive travel costs."

He said travel costs also take their toll in operating, maintenance, and material funds, and that "every dollar saved in travel means more personnel or material."

## Service Honors

Maj. Bernard Big, USA, has been awarded the first Oak Leaf Cluster to the Army Commendation Ribbon for meritorious service while serving with the Army Military Mission with the Imperial Gendarmerie in Iran from 9 April 1955 to 30 April 1958. In the capacity of G-4 Supply Advisor and Medical Department Advisor to the Gendarmerie, Major Big, through his knowledge of the Persian language, was able to improve Iranian operational efficiency by helping them to understand modern concepts of logistical and medical operations. Major Big came to First Army Headquarters, Governors Island, N. Y., in July and is assigned to the Inspector General's office.

Col. O. F. Lassiter has been awarded the Legion of Merit for outstanding performance of duty as Commander of the 4083d Strategic Wing at Thule AB, Greenland. He now commands the 99th Bomb Wing at Westover AFB, Mass.

Lt. (jg) Delbert L. Brown, USN, has been posthumously awarded the Navy and Marine Corps Medal for his efforts to aid fellow crew members who had crashed with him near Alaska on 10 October, 1957. After refusing aid for himself, he disappeared in the water near the tail of his aircraft.

LCdr. Jack Neiman, jr., USN, has received the Commendation Ribbon with Metal Pendant for volunteering to test the Mark III full pressure suit for 44 hours at simulated heights up to 105,000 feet, at the Norfolk, Va., Air Station. He was cited for his "outstanding courage under extremely hazardous conditions" during that space travel experiment.

### Guard Hears Gen. Norstad

General Lauris Norstad, Supreme Commander, Allied Powers in Europe, will address the Annual States Dinner of the 80th General Conference of the National Guard Association 1 October in Atlantic City, N. J.

Also scheduled as a dinner speaker is New Jersey's Governor Robert B. Meyner.

"The role of the National Guard on the country's defense team of the future" will be the theme of the Conference, which will be attended by nearly 5,000 National Guard officers and their guests, including a dozen governors, ranking military leaders and other distinguished guests.

The Secretary noted that one Bureau "by austere management" has reduced Temporary Additional Duty expenditures in Fiscal Year 1958 by 50% of that expended in Fiscal Year 1957.

"To effect savings of this magnitude," he said, "it is necessary that justification for each set of TAD orders be carefully scrutinized by the commanding officer or his responsible delegate to insure the essential nature of the travel. Requests based on the fact that it has been done in previous years are not acceptable."

He stressed that "each trip must be justified on its own merit."

In SecNavNote 4650, the Secretary told all naval activities authorized to issue travel orders to take the following action:

- Effect reductions in travel by carefully screening all orders and authorizing only those which are essential.

- Use transportation requests wherever possible in lieu of mileage and monetary allowances.

- Apprise travelers of availability of scheduled-coach, custom-coach, or tourist-class commercial air transportation in lieu of first-class air transportation where it will meet requirements of the traveler.

He cautioned that travelers "are not to be forced to accept a lower class of transportation than that to which entitled."

AF BORROWS NAVY CUSTOM—Lt. Col. Elmer P. Fixer (left), the "oldest" officer in terms of service at the Arnold Engineering Development Center, Tullahoma, Tenn., turns over the "plank" to Capt. Calvin C. Schneider, (right), a four-year man at the Air Center. Maj. Gen. Troup Miller, Jr., AEDC Commander, (center), obviously approves of the Navy's way of doing things. Lt. Col. Fixer, Center Judge Advocate for the past five years, leaves for his new assignment as Chief of the Legal Department, Kadena Air Base, Okinawa. Captain Schneider is Engine Test Facility Project Officer, Deputy Chief of Staff, Installations Engineering.

## IRS Eases Income Tax Rules On Travel And Transportation For Service Families

Military families have been given a break on reporting mileage and per diem expenses while travelling, but the Internal Revenue Service still wants to keep track of those few persons who can make money while in a travel status. Revising its rules on reporting Government travel payments, the IRS (in Revenue Ruling 58-453, Internal Revenue Bulletin 1958-37, 15 September) says that military personnel who broke even or lost a little on Government travel may forget about reporting mileage and per diem on their income tax returns, provided they do not want to make a claim for excess travel expenses.

They need only note on their return that the Government payments did not exceed expenses.

From those who can and do make money on Government travel, the IRS wants a complete breakdown of expenses on their income tax forms, with the money saved on the Government travel

allowance listed as income. The breakdown should be in such categories as transportation, meals, lodging while away from home overnight, entertainment expense, and other business expense.

Those who lose money on Government travel and who want to claim their losses as income tax deductions, will also have to provide a breakdown of their travel expenses on the income tax forms.

Before the new ruling, military personnel were required to list all travel and per diem payments as income and separately deduct their travel expenses.

Persons travelling for private employers, Revenue officials say, will be able to treat fixed mileage and per diem allowances in the same manner as Government employees and military personnel. In their case, however, the rule applies only to allowances which do not exceed 125% of the maximum authorized for federal employees.

copters, four "weapons ships" helicopters, and an organica Infantry Platoon, as well as logistical support elements, also available for medical evacuation missions.

General Cairns stressed that until now the Army has been forced to use improvised equipment—much of it obtained through the cooperation of the Navy and Air Force—to test new concepts.

"We have had to beg, borrow, and steal," he told the Aviation Writers group.

Questioned about the vulnerability of armed helicopters, General Cairns said that they are "no more vulnerable than C-47's which carried paratroopers in WWII or amphibious landing craft. If employed properly," he said, "helicopters are not unacceptably vulnerable."

The Army's Combat Developments Experimentation Center at Ft. Ord, Calif., is conducting special Army Aviation vulnerability tests this fall.

General Cairns said he expects the results to show that helicopters and light fixed-wing aircraft, employed to take full advantage of the terrain, can fight effectively on the battlefield of the present and also the battlefield of the future.

The Aviation Center Chief said that industry "seems to be on the verge of major breakthroughs" in providing the Army with better means of aerial mobility. He did not go into specifics, however.

General Cairns was introduced by Lt. Gen. Walter L. Weible, USA-Ret., Execu-

### ARMED COPTERS O'SEAS

Expanded Army use of helicopters armed with machine guns and rockets is in the offing.

It was reported this week that General Henry I. Hodes, who commands US Army Europe, is seeking approval from Washington to arm all helicopters in his command with machine guns or rockets, or a combination of these weapons. It was stated also that blueprints for arming helicopters have been sent from Fort Rucker, Ala., to General I. D. White, who commands the US Army Pacific.

In addition to General Weible and General Cairns, others at the head table for the AWA luncheon included: Mr. Robert M. Loebelson, AWA Vice President and Regional Director; Col. H. D. Edson, Deputy Director of Army Aviation; Col. G. P. Seneff, jr., Chief of the Air Mobility Division of the Office of the Chief of Research and Development; Col. S. K. Eaton, Executive Officer of the Army Office of Chief of Information; Col. F. C. Norvell and Mr. E. J. Cottrell, Jr., Assistant Chiefs of Information, Department of the Army.

Also, Lt. Col. Alex Rankin, Deputy D Chief to Col. Seneff; and Mr. John B. Spore, Executive Editor of "Army" magazine, the monthly publication of the Association of the US Army.

## Navy Promotion System Under Scrutiny; Army-Air Force Experts Aid New Study

From first page—

Personnel said that Admiral Hobbs' group was an informal study unit. However, other officials referred to it as a "board."

**RAdm. Ray C. Needham, USN**, Assistant Chief of Naval Personnel for Personnel Control, another member of the board, described the sessions as a "family get together to review the Navy promotion system."

Admiral Needham told THE JOURNAL that the Navy wants to find out if it still has the best promotion system in the Services and "how to make it the best."

He said that the study group and/or board or get-together, was reviewing such matters as the "youth movement," to determine whether it should be continued, or stopped.

Admiral Needham, reached in the ab-

sence of Admiral Hobbs, acknowledged that the "hump" problem was included in the study.

**LCdr. John M. De Largy, USN**, is recorder for the group.

THE JOURNAL this week asked the Navy for the names of other members, but was told these could not be made available.

### Capt. Sherbundy At Dayton

**Capt. Robert E. Sherbundy** has been assigned to the Dayton, Ohio, Air Force Depot under Col. A. A. Denton. Following duty in England, Captain Sherbundy will be Deputy Director of Personnel and Base Services.

Captain Sherbundy lives with his wife, Betty, and their two children at 3879 Tait Rd., Kettering.

## Arkansas Attorney Is Civilian Aide

Secretary Wilber M. Brucker has named Mr. James H. Clendening of Fort Smith to be Civilian Aide to the Secretary for Arkansas.

An attorney, Mr. Clendening is President of the Ozark Chapter of the Association of the U. S. Army, and is also Chairman of the Military Affairs Committee of the Fort Smith Chamber of Commerce.

## STRIKE UP THE BAND

The Army has told commanders at all levels to take "full advantage" of opportunities to utilize the "outstanding ability, importance, and prestige of the United States Army Field Band to the maximum extent for purposes of welfare, recreation, and morale."

AR 28-72 notes that the famed Band is authorized to provide performances at military installations in conjunction with its regular concert tours.

**ZI ARMY COMMANDERS**—General Bruce C. Clarke, Continental Army Commander, poses with commanders of the six continental armies and the Military District of Washington during a reception last week at Ft. Monroe, Va. Commanders are, left to right, Maj. Gen. G. S. Meloy, who will assume command of Fourth Army 1 October; Maj. Gen. J. G. Van Houten, MDW; Lt. Gen. G. W. Read, Second Army; Lt. Gen. W. H. Arnold, Fifth Army; General Clarke; Lt. Gen. B. M. Bryan, First Army; Lt. Gen. C. D. Palmer, Sixth Army, and Lt. Gen. C. L. Ruffner, Third Army. The generals were at Monroe to attend a two-day Commanders' Conference.

## Col. Schockner Heads Army Flying School; Army Aviator Gets Cold Weather Billet

Col. Lester F. Schockner has assumed command of the Army's primary flying training school at Camp Gary, Tex. He replaces Col. Jules E. Gonseth, jr., named

Chief of the Aviation Department at Fort Huachuca, Ariz.

Colonel Schockner had served as Secretary of the Aviation School, Ft. Rucker, Alabama.

Col. Frank G. Forrest, former Chief of the Aviation Section, Sixth Army, Presidio of San Francisco, has arrived at Ft. Greely, Alaska, for assignment to the Army Cold Weather and Mountain School as Assistant Commandant.

He replaces Lt. Col. Thomas W. Alvey, who becomes Director of Instruction.

Col. Daniel H. Heyne is the new Assistant Commandant of the Army Primary Helicopter School, Camp Wolters, Tex. A USMA '34 graduate, he previously had earned a Bachelor of Arts degree in money and banking from Texas A&M College.

Prior to his arrival at Wolters, Colonel Heyne served as CofS at Fort Rucker, Ala. Colonel Heyne, his wife Kathryn, and children, Pamela Ann and Peter Marshall, reside in Wolters Village.

## CONARC Names Two For Staff Posts

General Bruce C. Clarke, CONARC Commanding General, has named:

Col. Andrew J. Boyle, formerly Secretary of the General Staff, as deputy CofS to succeed Col. Herbert G. Sparrow who is attending an Advanced Management course at Harvard University.

Lt. Col. James W. Love replaces Colonel Boyle as secretary of the General Staff. He was formerly with the Combat Developments Section.

Colonel Boyle has been stationed at CONARC since June 1957. Prior to his arrival, he was G3 of the V Corps in Germany.

Colonel Love has been at CONARC since October, 1957. Prior to his arrival there, he was with the V Corps G3 Section.

## Gen. Disney To Europe, Move Two Brigadiers

## Enhance Company Commander Prestige, Is Army's Order; Inquiry Directed

COMMANDERS of company-sized units must not be subjected to "unessential administrative personal workloads," the Army has declared. A new warning is sounded in Circular 20-6 against actions which cause a loss of morale and lowered prestige and effectiveness among junior officers in command billets.

The Army has directed that "Elimination of unessential requirements imposed on company-size unit commanders" be made a special subject for inquiry by Inspectors General during fiscal '59.

"Continued emphasis at Army Staff and all field command levels is essential," the Circular declares, "to insure that the prestige attached to company command is enhanced and that freedom of action and initiative

of company commanders are not unduly restricted."

The Army says that "unnecessary requirements for personal certifications and signatures of company commanders have tended to destroy the significance and value of such certificates and signatures."

Inspectors General are to inquire about actions taken by echelons above company level to reduce the company commander's administrative burden.

The Pentagon wants to know also how much time per week is spent on company administration.

Another question: "Are prerogatives of company commanders with respect to the use of unit funds adequately protected when the administration of these funds is centralized at battle group level?"

## Navy Says Old Carriers Cost \$4 Million In Unnecessary Aircraft Accidents Yearly

(Win CNO Awards, Page 11)

**D**ESPITE its lowest aircraft accident rate in history—2.83 per 10,000 flying hours in FY '58—the Navy claims an even better safety rate could be achieved if there were more new carriers available.

Because the 27,000-ton Essex-type ships have 60 feet less runway space, Navy authorities said, each of these ships has an average of \$4 million in unnecessary aircraft accidents yearly.

As an example, the Navy said, landing operations of the Navy's six newest supersonic aircraft aboard the big 60,000-ton carriers were twice as safe as on the smaller carriers.

Carrier landing accidents for FY '58 went down to an all-time low of 0.9 per 10,000 flying hours, mainly due to the use of the angled deck carrier and the mirror landing system.

The previous record low was 2.4 in 1951.

Compared with the FY '57 aircraft accident rate of 3.05 major accidents per 10,000 hours of flight, the '58 rate of 2.83 represents a saving of 35 pilots who would have been killed in crashes, 91 major aircraft accidents avoided, 45 planes operating which would have been completely destroyed, and \$27 million saved in the costs of damaged aircraft.

Navy authorities stressed that the accident reduction was accomplished despite the fact that six new high performance aircraft were introduced into fleet squadrons during the year: the F4D, A4D, A3D, F8U, F3H and F11F.

"Past experience," a Navy safety official said, "shows that the accident rate for any new aircraft is the highest in its first year of fleet duty."

## Fourth Nuclear Sub Placed In Commission; Cdr. Cramer Is Skipper; Next 1 October

The fourth nuclear powered submarine, USS Swordfish—the first to be built at a Navy shipyard—has been placed in commission with Cdr. Shannon D. Cramer as Commanding Officer.

Executive Officer is LCdr. Jeffrey C. Metzel.

The first three atomic submarines, Nautilus, Seawolf and Skate, were built by the Electric Boat Division of General Dynamics Corp., Groton, Conn.

The Swordfish, launched 30 July at the Portsmouth, N. H., Naval Shipyard, is 267 feet long and has a 25 foot beam. She is the second in the Skate-class.

The third Skate-class A-sub, USS Sargo, is scheduled for commissioning 1 October at the Mare Island, Calif., Naval Shipyard. Her skipper will be Cdr. Daniel P. Brooks. Sargo's Executive Officer will be LCdr. Roth S. Leddick.

The first of a new class of attack A-subs, the USS Skipjack, is slated for commissioning at the General Dynamics Yard in November. Skipjack will be 252 feet long and have a 31-foot beam.

Principal speaker at the 15 September

commissioning ceremony of the Swordfish was Vadm. John L. McCrea, USN-Ret., former First Naval District Commandant. The current First Naval District Commandant, RAdm. Carl F. Espe, placed the new sub in commission.

## Navy Seeks Applicants For Officer Training

The 13th annual national competitive examinations for the Naval ROTC will be given to interested high school seniors 13 December, Vadm. H. Paige Smith, Chief of Naval Personnel, announces.

Application forms, which must be submitted to the Bureau of Naval Personnel by 15 November, are available from BuPers, all high schools, colleges and Navy Recruiting Stations.

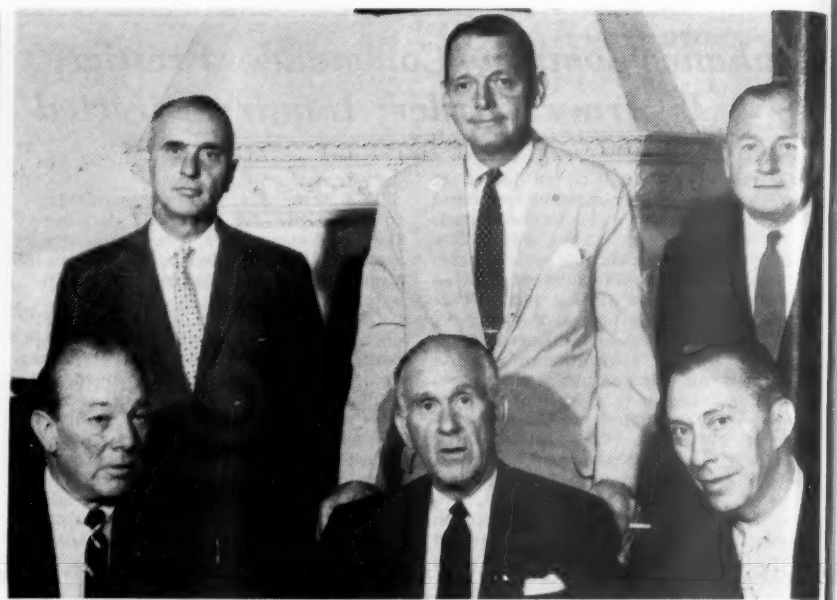

Approximately 1,800 candidates will be chosen to begin their naval careers in September 1959.

In order to be eligible, applicants must be between the ages of 17 and 21.

All tuition, fees and books are supplied by the Navy. In addition, the NROTC student receives a retainer of \$600 for four years.

Those who complete the four-year college course are commissioned in the Regular Navy or in the Marine Corps.

Following graduation from college, new officers are permitted to make application for flight training.

**PLAN NAVY LEAGUE SESSIONS**—The 1959 Convention Committee recently held its first organizational meeting in Philadelphia to discuss plans for the Navy League's 57th National Convention 6-8 May. Laying the groundwork for the three-day affair are: (seated, l to r) William Linton Nelson, investment fund head and General Convention Chairman; John J. Bergen, Navy League National President; and E. J. Hesketh, retail executive who is chairman of the Promotion Committee; (standing, l to r) Gordon K. Harper, insurance executive and Planning-Operations Committee chairman; William Cramp Scheetz, jr., architect and chairman of the Finance Committee; and John R. Woolford, investment broker and Deputy Convention Chairman.

He succeeded Lt. Col. Hector Migneault who reports to the 1st Marine Division Exercise, Control and Inspection Group.

## Navy Shifts 16 Ships To New Classification

The Navy has dropped the Service Craft classification "Ocean Radar Station Ship" and added the title "Radar Picket Ship" to its list of Auxiliary Vessels.

Effective 28 September, the 13 active duty YAGR's and the three undergoing conversion, will be designated AGR's and bear hull numbers 1 through 16.

Eight of the AGR's—Guardian, Lookout, Skywatcher, Searcher, Investigator, Outpost, Protector and Vigil—are under operational control of Commander, Airborne Early Warning Wing, Atlantic. RAdm. William I. Martin, who was named for two-star rank by this year's selection board, has been ordered to the Command, with additional duties as Commander, Fleet Air, Argentina.

RAdm. Benjamin E. Moore, Commander, Barrier, Pacific, has operational control of five AGR's—Scanner, Locator, Picket, Investigator and Interdictor.

The remaining three AGR's—Interrupter and Watchman—are being converted at East Coast shipyards.

## Vought Vocabulary

**ac'cu-ra-cy:** guided all the way, this long-range missile pinpoints distant, hard-to-hit targets

This nuclear-armed "bird" is the supersonic missile with which the U.S. can retaliate against the toughest of enemy targets—distant, hard-to-hit military fortifications.

Chance Vought's *Regulus II* provides the extra margin of accuracy that enables the Navy to zero in on such "small"—and deadly—strongholds as H-bomb storehouses, submarine pens, ballistic missile bases.

The instant *Regulus II* launches, its advanced

guidance system takes control... constantly compensating, correcting... keeping this Mach 2 missile on target to the instant of impact.

In production now, *Regulus II* provides double deterrence: the power to help forestall nuclear war—pinpoint accuracy to deter localized trouble.

### Walla Walla Cadet Heads USAFA Wing

Cadet First Class Robert Duane Beckel of Walla Walla, Wash., has been appointed Commander of the Air Force Cadet Wing for a second time at the U. S. Air Force Academy, Colorado Springs, Colo.

The 21 year old member of the Class of '59 will hold the temporary rank of cadet colonel while serving in this position during the fall semester. He previously held the highest position in the Cadet Wing during the first semester of the '57-58 academic year.

Cadet Beckel has served three years as squadron representative on the Honor Committee, which administers the Honor Code, and has been a member of the Cadet Forum, an organization formed to provide cadets with the opportunity to increase their knowledge of national and international affairs. In addition he has played on the Academy baseball and basketball teams, lettering in both sports since entering the Academy in July, 1955.

Appointed to serve with Cadet Beckel on the Wing Staff were Cadets First Class Gerald J. Garvey, Wing Operations Officer, Edwin J. Montgomery, Jr., Wing Adjutant, and Wayne O. Jefferson, Jr., Wing Materiel Officer.

Cadet Jefferson is the son of Col. and Mrs. W. O. Jefferson, 4718 Albemarle St., N. W., Washington 16, D. C.

Twelve squadrons make up the Cadet Wing of 1,148 cadets, who began classroom work 3 September at the permanent site eight miles north of Colorado Springs.

## Supply Chief, Four Others In AMC Will Receive AFA Management Awards

Maj. Gen. Frederick J. Dau, Air Materiel Command Director of Supply, and four others at AMC, Wright-Patterson AFB, Ohio, will receive awards for management at the Air Force Association Convention 27 September in Dallas.

General Dau's award is called the Distinguished Management Award. The other winners include:

Col. Douglas R. Brown, Director, Air Force Petroleum, Hq. Middletown, Pa., Air Materiel Area—General Management Award.

Col. Joe P. Walters, formerly Chief, Electronic Defense Systems Division, Directorate of Procurement and Production, Hq. AMC (now attending the Air War College, Maxwell AFB, Ala.)—Procurement and Production Management Award.

Roy H. Van Horn, Deputy Director of Maintenance Engineering at San Antonio Air Materiel Area—Maintenance Management Award.

Col. Richard W. Dyer, Director of Supply and Services, Sacramento Air Materiel Area—Supply Management Award.

Winners were chosen from nominations made by AMC and submitted to a joint AMC-AFA board, of which the AMC members were all general officers. All AMC air materiel areas and depots, as well as AMC Headquarters, had a chance to nominate outstanding personnel.

The award went to General Dau for "exemplary managerial ability while serving as Director of Supply, Headquarters, Air Materiel Command." He championed the management concept of placing the

greatest emphasis on the most important, essential, and costly aspects of management.

"General Dau's application of this concept to Air Force materiel—the Hi-Valu Program—" the citation that accompanies the award continues, "reduced costs for the Air Force by millions of dollars and won him acclaim, Air Force-wide. His extension of this Hi-Valu concept of management to all Air Force logistic problems was a most significant achievement during 1957. Through his long-range vision and singular ability to predict trends of the times, he was able to remold the organization, mission and operation of the worldwide Air Force supply system in advance of actual demand for the change. Under his dynamic leadership, the effectiveness of logistic support for the Air Force at every point throughout the world has steadily increased. General Dau's outstanding accomplishments in the field of logistic management have materially assisted in welding the free nations of the world into a united effort which reflects the highest credit upon himself and the United States Air Force."

### ALL-JET GUARD

The Air National Guard's 83 combat squadrons will be entirely jet-equipped upon completion of transitional training now taking place by the 149th Fighter-Interceptor Squadron of Richmond, Va.

The 83 combat squadrons in the Air National Guard are based in the 48 States, Alaska, Hawaii, Puerto Rico, and the District of Columbia. Fighter squadrons are equipped with F-100's, F-89's, F-94's, F-86's and F-84's. Tactical reconnaissance squadrons employ the RF-84F and the RB-57.

### Once Held By Russians, Lt. Col. Salter Bakalar C. O.

Lt. Col. Richard D. Salter has assumed command of Bakalar AFB, Ind.

Executive Officer since July 1956, he replaces Col. Junius W. Dennison, jr., USAF-Ret.

In September 1943 Colonel Salter's B-25 was damaged over Japanese territory during a bombing raid and he was forced to make an emergency landing in Russia. The Russians held him and his crew for five months before they were allowed to return to the American forces.

He and his wife, Leila, have three children, Helen, 13, Margaret, 11, and Donald, 8.

## Let's Extend Survivor Benefits To All Survivors

It is a strange anomaly that a professional Army, Navy, Air Force, or Marine man who retires after completing a full career in the Armed Services must worry more about the welfare and security of his survivors than does a short-timer on active duty. Under existing law, the Survivors Benefits Act protects the families of all on active duty but that protection ceases once retirement comes. The only exception is for those retired personnel whose deaths are directly attributable to their active service.

There is no doubt but that the enactment of the Survivor Benefits Act was a giant step forward in the career incentive plan. Before that there was little security for the family of the peacetime professional military man. Restriction of the new benefits to personnel on active duty was done solely for reasons of economy; it was feared that the cost of an all-inclusive act would defeat the measure.

Yet there is little defense for the present situation. Certainly a commissioned or non-commissioned officer who devotes all of his active years to the defense of his nation deserves the peace of mind that goes with assurance that his survivors will not be in want. It is also evident that his retirement income is so much lower than that which he receives on the active list that he is financially unable to make suitable provision for them.

Last week's JOURNAL reported the movement in Congress, bi-partisanly backed by Representative James B. Utt (R-Calif.) and Senator John J. Sparkman (D-Ala.), to remedy this shortcoming in the law. Under their proposal anyone who completes 25 years' active service prior to retirement would continue under the protection of the Survivor Benefits Act.

In January of 1957, the House Veterans Affairs Committee asked for the Administration's views on this proposal. Letters were sent to the Department of Defense, the Veterans Administration, the Treasury Department, and the Bureau of the Budget. None has yet replied.

The measure will be reintroduced when the 86th Congress convenes next January. We hope by that time the Department's comments will be before the Congress so that, favorable or unfavorable, hearings may be started. The fact that members of Congress report they have received many letters urging correction of this situation, and that they probably will receive many more, will give added impetus to the measure.

## Navy Leads The Way To Faster Surface Ships

Naval research into methods of attaining high speeds with its surface ships offers promise of paying off soon in large figures.

While speeds of aircraft and undersea boats have made enormous advances in recent years, there has been no major speed-up in surface vessels. Of course, surface ships have made immense strides in design and structure for new uses, such as the super-carrier types, the missile ships, and others. The fact that it was the Allies who crossed the water to attack Germany, while the latter muffed her earlier opportunity to cross the English Channel, can be attributed in large measure to the U. S. Navy's development of special craft of many types and the building of them in large numbers.

Now two recent developments mark major break throughs in the field of surface speeds. One is the announcement by the Office of Naval Research of the "super-cavitating" propeller described as "a significant scientific and engineering advance in modern ship propulsion unprecedented in the past 30 years of hydrodynamic accomplishments." The other is the news, revealed in Congressional testimony, that the U. S. Navy has made major strides in the field of hydrofoil boats, particularly in the area of making it possible to operate such craft in rough seas.

To a public inured to measuring defense progress in the terms of faster-than-sound aircraft and moon-reaching missiles, the significance of these developments may be lost. But we may be sure that the news of these break throughs is registering in the war offices across the iron and bamboo curtains.

It must not be forgotten that while these devices are developed for ships of war they will have a far reaching effect upon peaceful trade and commerce.

## Wipe Out Antiquated Dual Compensation Laws

We hope Congress and the Administration will press forward, when the 86th Congress convenes, in the movement to repeal the outdated and restrictive dual compensation and dual employment laws.

The Administration is now on record as endorsing such action. As reported in THE JOURNAL of 6 September, the Navy, in declining to endorse a bill exempting an individual from such laws, suggested that the laws be repealed entirely so that all retired regular personnel would be relieved of the restrictions. Inasmuch as the Navy's letter had to be cleared by the Bureau of the Budget it was tantamount to the Administration's acquiescence in the move.

There are many sound reasons for repealing the laws. One very good reason is that they act to deprive the government's civilian agencies of the needed and capable services of trained administrators, executives, and technical experts. Many retired officers who may not be physically up to the rigors of the Services are exceptionally well qualified for jobs in other government departments or agencies. But the restrictions on their pay and employment bar them from accepting the positions.

One of the lessons we should have learned over recent years is the importance of making the utmost use of our trained manpower. Certainly we are working against ourselves in keeping retired Service personnel out of civilian government positions.

## READERS' VIEWS

### Thanks To The Journal

On behalf of the American Veterinary Medical Association, and personally, our sincere appreciation for the real contribution made by THE JOURNAL in objectively reporting on the work performed by military veterinarians, in connection with the proposal initiated by former Secretary of Defense Wilson to eliminate the Veterinary Services in the Armed Forces.

The many articles and items published in THE JOURNAL on the subject matter evidenced a clear understanding of veterinary medicine, including its relationship to public health.

Thank you for your editorial support. Best wishes for your continued success.

### In The Same Boat

It's gratifying to learn that Navy personnel planners have at last come up with a plan to equalize promotion chances of officers in the so-called "hump" years.

I refer to the story that appeared in your magazine on 13 September telling that a Presidential Executive Order allows the Navy to suspend the five-year plan in setting up promotion zones. This action, obviously, was instigated by the Bureau of Naval Personnel and I'd like to applaud the Bureau for its fairness. Naturally, I don't think that the 50 percent passover rate for Regulars anticipated by the Navy for those

of us in the "hump" is desirable in the long run. The services of too many capable officers will be lost forever.

But at least, the "freeze" plan puts all "hump" officers in the same boat. And this is only right, since we all were in the same boat during the War.

When my number comes up, I'll be sweating it out with the rest of my contemporaries wondering if the board will place me in the lucky 50 percent group. Of course, if I am passed, it will be an excruciating disappointment because I plan a full career. But if I fall into the unlucky 50 percent, I will at least have the consolation of knowing that I was not passed over because of an inequitable selection percentage in the previous year.

"HUMP" LCDR.

### The Will To Vote

It is encouraging to note in THE JOURNAL of 6 September that the Department of Defense is taking an interest in the voting rights of the men and women in the Services.

This has a deeper significance than protecting the rights of service personnel to vote in their home states. Unfortunately, an unduly large percentage of those at home fail to vote through sheer neglect or apathy. The best way to improve this situation is to impress upon new voters, just reaching voting age, the importance of this right for which their ancestors fought.

Today there are thousands of American youth who are reaching the voting age while in uniform. If the states, by too restrictive regulations, discourage them from voting by mail they may well get them off to a bad start and increase the number of voluntary non-voters in this country.

More power to the DoD in its "get out the vote" movement.

COLONEL, USA-RET.

## IN THE JOURNAL

**10 Years Ago**—The Navy is planning to build a 324-foot blimp, the largest non-rigid, lighter-than-air craft ever designed. Capable of long-range patrol over open ocean areas, the new type "N" blimp will be nearly twice the size of the Navy blimps used for anti-submarine patrol in World War II.

**50 Years Ago**—The urgent need of an increase in the Signal Corps of the Army and in the appropriation for its support is made apparent by the additional work the development of aeronautics is imposing upon the corps.

**95 Years Ago**—Something vigorous should be done at once in the several states, to revive and increase the militia. In most of them it has dwindled to a shadow, the bulk of its members being in the three years' army, and their old places still vacant.

### Pay For Retired Reserves

It's certainly good news to hear that the Comptroller has put an end to Pentagon nitpicking on retroactive pay for retired Reservists.

As one of those who will receive a substantial benefit from the Comptroller's recent ruling, I would like to thank THE JOURNAL for its extremely accurate and up to the minute reports on the subject. Yours was the only paper which carried the full story on Title III pay, following its progress from the Segrave decision in 1955 through conflicting Comptroller decisions and beclouded Service policies, to the present, most-welcome outcome.

Your "crystal ball" preview of what the final decision would contain (in the 26 July issue) is an excellent example of your superior reporting.

MAJOR, USAR-RET.

## New Armed Forces Enlisted Stripes And Titles Are Certain To Confuse

From first page—

five stripes; Navy top-graders, called Master Chief Petty Officers, wear four stripes.

Although stripes are worn with special devices, such as stars, eagles and bursting bombs, the uninitiated are likely to be confused by the variations.

The confusion extends to the lower ranks as well. An E-4 in the Army and Marine Corps is a Corporal, and a Sergeant in the Air Force. The Navy equivalent is Petty Officer Third Class. The Marine Corps also has a temporary Corporal, known as an Acting Sergeant, serving in pay-grade E-4.

An Airman Second Class in the Air Force (pay-grade E-2) is the equivalent of a Marine Corps Private First Class and an Army Private.

The Army, which was without a three-stripe Buck Sergeant designation since 1948, was shelled with adverse criticism when it announced that the rating again was being pressed into service.

At the time of the announcement early in June, the Army said that NCO's who had been wearing an arc below the three stripes would lose their rockers. E-6's and E-7's also were told that they would be required to remove one arc from their sleeves. A lag of several months was granted by Headquarters to give the Army time to "educate the public to the fact that these men have not been reduced in rank."

Then, in the face of vehement objections, the Army extended the time for the changeover until 30 June 1962.

The Air Force made approximately 2,000 E-8's on 1 September. Army quotas for the period ending 30 September will permit 700 promotions to the new E-8 rank.

The first advancements to E-8 and E-9 in the Navy will be effective 16 November. Criteria for consideration by selection boards was told in THE JOURNAL, 10 May, page 6.

The Marine Corps has had E-8's and E-9's for some time. Headquarters selection boards chose Sergeants Major and First Sergeants for the super pay-grades shortly after enactment of the Career Compensation Act which became effective 1 June 1958.

In the adjacent chart, the titles in the first Army column extending from pay-grade E-9 through E-4 indicate Non-Commissioned Officers, while the second column shows Specialist ratings. Men in pay grades E-1 through E-3, in both columns hold the same titles until they attain rank E-4 in either the NCO or the Specialist category.

The "Acting" titles shown in column six, under the Marine Corps heading, were devised to prevent the loss of stripes and prestige. Ultimately, the "acting" ranks will disappear from the Leatherneck enlisted rank structure. "Acting" ranks will be retained until promotion or retirement.

The titles of all pay grades of Armed Service enlisted men are shown in the table at the top of the page.

### Twenty E-8's At MacDill

Twenty MacDill AFB, Fla., master sergeants have been promoted to E-8.

They are Lloyd W. Garner, Samuel A. Shiver, Michael J. Siconolfi, James D. Waldron, John F. Bir, William E. Brown, John R. Casey, sr., William A. Creal, jr., Stuart G. Lang, Francis E. Army Communications Zone, Europe, promoted to Master Sergeant in the pay grade E-8, is kissed by his daughter Gloria (center) after a formal ceremony at Headquarters, Com Z, in Orleans, France. Son Thomas awaits turn after his sister. Evins is First Sergeant of Headquarters and Service Company, 553d Engineer Battalion, stationed near Orleans. All 16 men were promoted simultaneously in ceremonies held at Com Z units throughout France and Germany.

### Make E-8 At Rushmore

Col. Dudley P. Eaton, Commander, Rushmore AFS, Rapid City, S. D., has announced the promotion of two airmen to the new E-8, senior master sergeant grade.

The new rating was awarded to M/Sgt. Charles H. Hagerman, Headquarters, 3081st Aviation Depot Group and M/Sgt. John F. Riordan, 3081st Air Police Squadron.

### Shaw's Senior Sergeants

Nine master sergeants at Shaw AFB, S. C., were promoted to senior master sergeant.

They are Willie C. Haynes, Willard L. Pope, sr., Fred Harrell, Clarence E. Cunningham, Arthur F. O'Donnell, Philip Gath, Dwight D. Eales, Olen J. Jones and Neil T. Shire.

## Navy Lists CNO Safety Award Winners

Highlighting its all time low safety record of 2.83 major accidents per 10,000 flight hours, the Navy has announced 38 winners of the coveted Chief of Naval Operations Safety Award.

The winners include 33 Navy and Marine Corps aviation squadrons, four aircraft carriers and the Naval Combat Information Center School.

In addition to the CNO awards, the Navy also announced 286 commands have maintained accident-free records during FY '58.

Each of these commands will be entitled to use special "accident free" insignia and a specially designed "accident free" rubber stamp for their outgoing correspondence.

CNO award winners and unit commanders, as reported by the Navy, are:

**A NEW NIKE HERCULES OVERSEAS DEPLOYMENT** is expected to be announced shortly. It will follow the Pentagon's statement 15 September that the 2d Missile Battalion of the 71st Artillery Regiment, Ft. Bliss, Tex., was being assigned "for service in the Pacific Area." The 2d undoubtedly is headed for Formosa.

**THE NEXT HERCULES SHIFT OVERSEAS** likely will be to Thule, Greenland. One possible problem is the reluctance of Denmark over stationing of a weapon with an atomic capability on land which it controls. It's recalled that a visit of the nuclear-powered submarine USS Skate to Copenhagen was cancelled.

**SECRETARY OF DEFENSE McELROY** has moved to stop public controversy between the Army and Air Force over the relative merits of the Hercules and the Bomarc missiles. Last week's issue of *The Journal* examined in detail the opposing views of the two Services.

**CDR. WILLIAM R. ANDERSON, USN**, the Nautilus skipper who will receive the Christopher Columbus International Prize for outstanding contributions to sea travel in Italy on 12 October, is waging a campaign to change the historical designation of submarines. Heretofore, unlike other naval vessels, they have been known as "boats" and not "ships." Commander Anderson told an NBC "Meet The Press" audience 14 September: "We think so much of the Nautilus, we have such a large ship that really I believe perhaps we should break tradition and start calling them ships rather than boats." Asked by Mr. Charles Corddry of UPI if he was getting anywhere with the idea, Commander Anderson said: "Well on the Nautilus I'm getting along on that. Whether I am anywhere else I don't know."

**A NAVY BEAN SOUP RECIPE CONTEST** is being staged by the Memphis, Tenn., "Commercial Appeal." Recipes, based on servings for six, must be sent by 18 October to the PIO for Naval Technical Training, Memphis Naval Air Station.

**A PARAGUAY WAC ORGANIZATION** is in the making. Sub-Lieutenant Marcelina Palacios-Almonte has been enrolled in the Officer Course at the U.S. Army WAC Center, Ft. McClellan, Ala., and will return to her native country upon graduation to be one of the first members of the yet-to-be-activated Women's Army of Paraguay.

**IN PAST YEARS**, there have been sharp protests from wives of Air Force master sergeants invited to the annual Air Force Association conventions as top airmen of the major commands. The wives suggested that it wasn't fair that they should be left at home. It will be different this year. The International Business Machines Corp. is going to pay the expenses of the wives of the "top airmen" for travel to Dallas, hotel accommodations, and incidental expenses.

**CONTRACT CONFUSION AND INVALID AWARDS** have cost the Navy 532 trucks valued at \$4,573,000. Funds for the trucks were voted by Congress in fiscal '58. The Navy called upon the Army's Tank Automotive Center in Detroit (the Army is responsible for all Service truck procurement) to contract for the vehicles.

**THE SAGA OF THE LOST TRUCKS** saw the bidding process completed this past April, two months before the end of the fiscal year. However, the Army took the position that the low bidder, International Harvester Company, had offered truck cabs which did not meet specifications for "conventional" truck cabs. The Army rejected the low bid, and awarded contracts to a higher bidder.

**THE COMPTROLLER GENERAL** has invalidated the contract and has told the Pentagon that the money can't be spent, since a proper contract was not executed during fiscal '58. The Comptroller said that the "conventional cab" requirement in the specifications was "a general term having no commonly accepted meaning."

**IN THE COMPTROLLER'S OPINION**, the contract should have gone to International Harvester, whose trucks were said by the Navy to be acceptable. However, by the time the paperwork and confusion were over, it was too late to award any contracts. There's no money in the fiscal '59 or proposed '60 budgets for replacement trucks.

**A DYE KIT WILL ACCOMPANY** the issuance of shoes to WAC basic trainees entering the Army at Ft. McClellan, Ala., beginning 1 July 1960. On that date, the black field shoe will become mandatory in place of the russet shoe. Because the Army has a considerable stock of russet women's field shoes on hand, it will be necessary after July '60 to issue recruits at the McClellan WAC Center "one pair of russet shoes as long as stocks are available, together with a dye kit procured locally, for redyeing the shoes," says Circular 670-29. All other women will have to procure dye kits from the PX or commercial facilities at their own expense.

**ARMY COMPANY COMMANDERS** will be pleased that the Pentagon has issued new instructions (Page 5) designed to reduce the administrative workload imposed on them and to provide more latitude for command decisions at this echelon. Realistically, however, they will recognize that similar "Paper Chase" orders have been issued in the past. One curious fact in the Army's new Circular is that the information obtained by Inspectors General in the special subject area of study is summarized each quarter by field commands "and maintained on file." The Circular makes no provision for a specific report to Washington on the problem and what's being done about it.

**NAVAL AVIATION'S NEW SAFETY** record of 2.83 major accidents per 10,000 flight hours (see story on Page 11) can be expressed as an average of 3,530 accident free hours between each accident. In the previous fiscal year the rate was 3.05 or an average of 3,280 flight hours between accidents. What does this 250-hour difference mean? It means that in FY '58 35 pilots are alive who would have been killed in crashes... 91 major aircraft accidents did not take place... 45 planes are operating that would have been completely destroyed... and \$27,000,000 in damaged aircraft costs have been "saved."

**HOW MANY GOATS** does it take to replace a soldier? At the Army's Ft. Benning, Ga., Infantry Center, 25 goats have been "enlisted" to keep the grass and underbrush cropped close in the Ammunition Dump Area. It's estimated that the animals, which eat about a ton of forage a month, will replace six men who otherwise would have to cut the grass manually.

**SPACE LOGISTICS** will be the theme of a conference 23-24 September at the Air University, Maxwell AFB, Ala. Brig. Gen. H. A. Boushey of USAF Headquarters will discuss the "Military Use of Space Vehicles," and Col. C. H. Roadman, also from USAF Headquarters, will report on "Keeping the Spaceman Alive." There will be five seminars on personnel, facilities, maintenance, supply, and transportation—all geared to the logistics implications of military space activities. The sessions are being sponsored by the USAF Long Range Logistics Discussion Group.

**INTERSERVICE COOPERATION** was stressed by Maj. Gen. Bogardus S. Cairns, USA, head of the Army Aviation Center at Fort Rucker, Ala. In an address this week (Page 1) to the Aviation Writers Association in Washington, D. C., General Cairns made a strong point of the fact that most of the weapons being used at Rucker to test the effectiveness of Armed helicopters have come from the Navy and Air Force. He praised their assistance in making the Army experiments possible. Asked about the possibility of the Army's testing the use of armed fixed-wing aircraft, he said that this is not being done because of the inter-Service agreement with the Air Force. This restricts the Army's use of aviation. Many observers believe, however, that the Army will say it is ludicrous to be allowed to arm helicopters but not light fixed-wing aircraft.

**ENLISTED PROFICIENCY PAY** for the Services was reported this week to be just about set for implementation, provided the Budget Bureau agrees with a program submitted for review by Secretary of Defense McElroy. But that's nothing new. Enlisted proficiency pay was all set for quick implementation by former Secretary of Defense Wilson, but he was unable to win a go-ahead from the Budget Bureau.

**AIR FORCE AND ARMY PUBLIC INFORMATION OFFICIALS** are striving to win approval from Assistant Secretary of Defense Murray Snyder for new disclosures of weapons advances that would be made in connection with the forthcoming conventions of the Air Force Association and the Association of the US Army. The AFA meets in Dallas next week. The following month, the AUSA will stage its annual meeting in Washington, D. C. Association leaders, always eager for wide national attention to the yearly conventions, know that much depends on whether speakers and panelists are allowed to report on developments which the individual services have cleared for security, but which need also a green light from Mr. Snyder's office. In view of the fact that Secretary of Defense McElroy is insisting that inter-Service disputes be checked, it would seem that the prospect that Mr. Snyder will be reviewing speeches and other presentations for the association sessions for "policy" as well as security.

**THE AIR FORCE'S '58 FIGHTER WEAPONS MEET** at Nellis AFB, Nev. will see supersonic aircraft consuming nearly 3 million pounds of jet fuel, about half a million gallons. Some 300 practice bombs will be dropped during the five-day competition which begins 13 October.

**THE QUARTERMASTER GENERAL** has been given world-wide responsibility for disposal of Army surplus supplies and equipment. A Property Disposal Center under the OQMG will supervise sales that have yielded an annual return to the Government of about \$100 million.

## Medical Notes In The U. S. Fighting Forces

### HONORED BY HOSPITAL ADMINISTRATORS

—Capt. William D. Tribble, USAF (MSC), Hqs. Fifth Air Force, Japan, has been elected to membership by the American College of Hospital Administrators. In the group are, left to right: Maj. Gen. Dan C. Ogle, Air Force Surgeon General; Dean Conley, Executive Director, American College of Hospital Administrators; and Captain Tribble.

**Col. Martin F. Sullivan, DC**, former Dental Surgeon of the Southern Area Command in Germany, has assumed the duties of Dental Surgeon at the Army Engineer Center and Ft. Belvoir, Va. He entered the Army in October 1937, and served overseas with general hospitals, hospital centers and station hospitals in England, France and Germany during WW II.

He and his wife, Virginia, reside in quarters at Ft. Belvoir.

**Dr. Benjamin F. Clark**, a colonel in the Army Medical Corps Reserve, has been named Civilian Aide to the Secretary of the Army for Vermont. He resides at 9 Undercliff Road, St. Johnsbury, where he is a physician and surgeon of obstetrics and gynecology.

**Capt. John D. DeCoursey, MSC**, reporting from the Naval Medical School, National Naval Medical Center, Bethesda, Md., has assumed duties as Head of the Vector Control Section, Health Practice Branch, Preventive Medicine Division, Bureau of Medicine and Surgery.

**Capt. James J. Dempsey, DC**, Commanding Officer, Naval Dental Clinic, Naval Gun Factory, Washington, D. C., has succeeded **Capt. Cline O. Williams, DC**, as Commanding Officer of the Naval Dental Clinic, Guantanamo Bay, Cuba. Captain Williams has resumed duties as Head of the Oral Surgery Department of the Guantanamo Clinic.

**Lt. Col. Harry A. Ferguson, MSC**, former Executive Officer, USAH, West Point, N. Y., has become Executive Officer, Madigan Army Hospital, Tacoma, Wash.

**Col. John D. Blair, MC, USA**, has been named Chief of the Orthopedic Service at Walter Reed Army Hospital, Washington, D. C. He succeeds **Col. Milton S. Thompson, MC, USA-Ret.** Colonel Blair came from Letterman Army Hospital, San Francisco, where he had been Chief of the Orthopedic Service since January 1952.

Colonel and Mrs. Blair, with their daughters Page, 15, and Dennis, 8½, reside in quarters at Walter Reed Army Medical Center.

**Lt. Col. Arthur Steer, USA**, has been named to command the USAEUR Medical Laboratory at the Army Medical Center, Landstuhl, Germany. He replaces recently departed **Col. Kenneth F. Ernst**,

### DEGREES FOR MSCs

Baylor University and Brooke Army Medical Center, Ft. Sam Houston, Tex., have combined to speed the training of Medical Specialist Corps Officers toward a Master's degree in hospital administration.

One of the first to benefit from the new program is Maj. Matthew Ginalick who has begun a year of rotating through the administrative sections of Fitzsimons Army Hospital in Denver, after completing a nine-month course at Brooke. He will be eligible for the degree after completing a thesis at the end of his rotating tour.

Formerly, graduates of the course work at Brooke were assigned permanently to an Army hospital, with five years to complete their theses. Many had to request extensions to complete their work since there was no formal rotation program to acquaint them with all phases of hospital administration.

reassigned to command the Sixth Army Medical Laboratory in California.

**Capt. James S. Harvin, USAF (MC)**, has been approved for six month's training in Hand Surgery at Passavant Memorial Hospital, Chicago. Upon completion of this training, he will return to Barnes Hospital, St. Louis, to finish training in Plastic Surgery.

### Capt. Perkins Heads Beaufort Hospital

**Capt. Paul K. Perkins, MC, USN**, Commanding Officer of the Naval Hospital aboard the hospital ship USS Haven, has assumed command of the Naval Hospital, Beaufort, S. C.

He succeeded **Capt. Paul G. Richards, MC, USN**, Hospital Executive Officer, who has served as commanding officer since the retirement of **Capt. J. R. Reid, jr.**, in July.

Captain and Mrs. Perkins and their three children reside in Quarters "A" at the Naval Hospital.

### Nine Attend Reed Course

The sixth class of the annual Military Medicine and Allied Sciences Course at Walter Reed Army Institute of Research has begun with nine students.

The nine-month course instructs medical officers, who have completed residency training in a specialty, in the military aspects of medicine. Considerable time is spent on the medical effects of radiation, radioisotopes, nuclear warfare, treatment of mass casualties, chemical and biological warfare agents and certain global epidemiological concepts of particular importance to military professional personnel.

Army doctors who are students are **Lt. Col. Walter H. Lumpkin**, Majors **W. R. Schilhammer** and **Arthur G. Law** and Captains **Vincent Cutshall**, **James E. McCarty**, **Murray Spotnitz**, **O'Neil Barret**, **Ralph S. Goldsmith** and **Robert J. T. Joy**.

Course director is **Lt. Col. Christian Gronbeck, jr.**

## Navy Sets New Policy For Cooperation In Conserving Fish And Game Resources

The Navy has established a new policy for the management and conservation of fish and game resources involving nearly three million acres of land controlled by the Navy Department.

The policy, set forth in an instruction by Secretary of the Navy Thomas S. Gates, provides for close cooperation and mutual assistance between military commanders and Federal, State and local conservation officials in planning and carrying out programs promoting fish and wildlife conservation through modern management techniques.

Because access to military reservations is closely controlled, they are ideally suited for fish and wildlife research projects conducted by official conservation agencies. The Navy Department now requires fullest assistance and participation possible by officers-in-charge of Navy and Marine Corps bases in such projects.

The Navy said that the instruction is expected to result in increased interest and understanding in wildlife management, more controlled acreage available for research, plus healthier game for American hunters and fishermen.

Under the Navy's increased interest in conservation, each of its military installations containing suitable lands will be studied to determine whether it can be used as a wildlife refuge, an experimental range or open for hunting, fishing or trapping by the general public under laws of the state or territory in which it is located.

Prior to World War II, the Navy and Marine Corps were located primarily at small installations near major harbors on sea coasts; but with modern weapons and aircraft training demands, the acquisition of large areas has become necessary so that now nearly three million acres of land is affected by the new policy.

## RIF Threat Eased As SecDef McElroy Discloses Delay In Manpower Cuts

### From first page—

manpower cuts have received wide attention, it is pertinent to recall that Air Force leaders told Congress—and this was before the outbreak of difficulties in the Middle East and Far East—that its projected strength of 850,000 for fiscal '59, was perhaps about 10,000 below requirements.

At his news conference last week, Secretary McElroy made no flat statement that the Administration's manpower reduction plan had been scrapped permanently.

He said only that reductions will not be made in the early months of the current fiscal year.

Asked if the Pentagon was holding off making any cuts until the Far East situation clears up, Mr. McElroy gave this response:

"Not necessarily depending on whether this clears up because we expect to have need for limited activity forces at intervals and have expected that that would be required with force levels of the 870 and 175.

"On the other hand," Secretary McElroy commented, "Communist China is a very large country. If this were the Middle East it might be a little different. We think that it is just as well to

stay where we are, at least for the three months period, but without prejudice to our ultimate decision regarding the end strength of fiscal '59."

By the "three months period," Secretary McElroy was referring to plans for expenditures through 30 September.

Obviously, with that initial planning period near an end, there will be need for at least another three months respite from any manpower cuts, and possibly much longer than that.

On the other hand, however, the Defense Department is under heavy pressure from the Bureau of the Budget to reduce expenditures, wherever possible, because of the growing Treasury deficit.

But whatever the deficit problem, Mr. McElroy's news conference comments serve to emphasize that there will be no rapid-fire action to slash manpower.

### November Draft Call 11,000

The Department of Defense has requested the Selective Service System to provide Armed Forces Induction Stations with 11,000 men during November for assignment to the Army.

The November call is the same as for the months of September and October.

## F-104's On Formosa; Essex Shifts Fleets

The Air Force this week permitted newsmen on Formosa to tell about the arrival of the 83d Fighter Interceptor Squadron equipped with the Lockheed F-104 Starfighter.

Lt. Col. John W. Bennett commands the F-104 force on the Far East bastion. "We feel it will be able to handle anything it is apt to come up against," Colonel Bennett told reporters.

First dispatches identified Capt. Walter Irwin and Capt. Orland W. Jensen as other Starfighter pilots on Formosa.

The Starfighter holds the world altitude and speed records for operational aircraft.

Also newly arrived in the Far East to strengthen US Forces is the carrier USS Essex, which was moved to the 7th Fleet from duty with the 6th fleet off Lebanon.

The Essex was accompanied to the Far East by the destroyers Sherman, Roan, Halle, and Royal.

The Essex joined four other carriers on duty in Formosan waters. They are the Midway, Hancock, Shangri La, and Lexington.

Meantime, the Army announced that a battalion of Nike Hercules surface-to-air missiles was being deployed to the Pacific. Although no destination was told for the Hercules battalion, it was believed certain to be bound for Formosa.

## BARRIER FORCES CHIEF

RAdm. William I. Martin, USN, has replaced Capt. Paul Masterton, USN, as commander of the Atlantic Fleet Barrier Forces.

The change of command took place at the Argentina, Newfoundland, Naval Station.

Admiral Martin also commands the Atlantic Airborne Early Warning Wing and Fleet Air, Argentina.

The admiral is recognized as a pioneer in the field of night carrier operations and all-weather flight.

He was one of three members of the USNA '34 class selected for flag rank in July.

The Barrier Forces include several squadrons of radar packed Lockheed Superconstellation aircraft and a number of radar picket vessels which conduct constant surveillance over a large area of the North Atlantic.

## Navy Gives Warrants To 42 Petty Officers

## Naval Academy Stadium Fund Goes Over Top

More than \$3,000,000 in contributions have been received to boost the Navy-Marine Corps Stadium fund over the top.

The Stadium will be the new home for football at the Naval Academy, Annapolis.

The drive, under way since January, 1957, surpassed its goal in early August, and contributions are still coming in. Additional income will be placed into a continuing maintenance fund for the stadium.

Ground was broken and work formally began on the double-deck, 29,000-seat stadium 1 March. The stadium is scheduled to be completed next August, in time to open Navy's 1959 football season with William and Mary College.

## Crain Hall Closes; Ike Ate There

Crain Hall at the Ft. Benning, Ga., Infantry Center has served its last meal after nearly 37 years of operation.

Conservative estimates, Benning officials said, placed the number of meals served in Crain Hall since its opening in 1921 at approximately 10 million.

Notable mess participants there have included Generals Eisenhower, Marshall, Bradley, and Patton.

In addition to its use as a mess, the building served as temporary headquarters for General Patton at the beginning of WW II. Prior to that, it was used as the Post Exchange grocery store, and as a hay barn for the polo team.

It was first known as the Biglerville Bachelors Mess.

## RAdm. Smith Heads Naval Air Reserve Training

RAdm. Allen Smith, Jr., will assume duties as Chief of Naval Air Reserve Training at the Glenview Ill., Naval Air Station 8 October.

Commander of the Naval Aviation Safety Center at Norfolk, Va., for the past two years, he relieves RAdm. H. Howard Caldwell, who reports to the Pacific Fleet as Commander, Carrier Division One.

Admiral Smith, USNA '27, was designated a Naval Aviator in 1930 upon completion of flight training at Pensacola.

## Two USMCR Colonels Win One-Star Rank

A Marine Corps selection board has chosen two inactive duty Reserve Colonels for advancement to one-star rank.

Named from a list of 27 eligible Reservists, including James Roosevelt, were Colonels Walter A. Churchill and Otto Lessing.

The board did not name any Reservists for two stars.

## Mrs. Kulmus At Fitzsimons

Mrs. Rosalie E. Kulmus, the widow of Ottmar Kulmus, has been transferred from the Fort Leavenworth, Kans. Army Hospital to Ward 4 West, Fitzsimons Army Hospital, Denver.

She recently suffered a fractured right leg and right shoulder in a fall at her home in Leavenworth, Kans.

## Army Tightens Rules For PCS Travel

The Army wants a reduction in the frequency of movement of military personnel. Permanent Change of Station travel will be authorized only on a "military necessity" basis in the future.

According to newly-published AR 614-8, policies applicable to all personnel include:

Individuals will not be reassigned just for the purpose of a change of assignment or because they have completed a stabilized tour.

Personnel on stabilized tours of duty will not be moved except as provided in AR 614-5.

The maximum number of faculty replacements at Service Schools will be obtained from members of graduating classes attending courses of instruction in a PCS status or from the replacement stream.

Individuals normally will not be moved during the last year of their term of service or within a year of mandatory retirement except for return to the U. S. by personnel completing a normal foreign service tour.

Personnel in overseas commands will not be moved except for compelling military reasons during the fiscal year in which they are scheduled to return to the U. S. or Territory of residence. If an individual has completed an intra-theater PCS move during the fiscal year of return, approval for return must be obtained from the Secretary of the Army.

The minimum overseas tour requirement for career officers and Regular Army enlisted personnel assigned to GYROSCOPE units is 28 months as outlined in AR 220-20.

## Capt. Phaler Commands Attack Transport Calvert

Capt. Walter L. Phaler, USN, has relieved Capt. Harry R. Stark, USN, as Commanding Officer of the attack transport USS CALVERT, flagship for the Pacific Fleet's Amphibious Squadron Five.

Captain Phaler's wife, Marjorie, and their two children, Walter, 17, and Susan, 13 reside at 1071 Acron St., San Diego.

Captain Stark, has been ordered to duty on the Staff of VAdmiral Herbert G. Hopwood, CinC, Pacific Fleet.

## Gen. Twining Heads ICAF Guest List

**INDUSTRIAL COLLEGE RECEPTION**—Chatting here during the annual Industrial College of the Armed Forces reception at Ft. McNair, Washington, D. C., are, left to right, RAdm. Sherman R. Clark, USN; Mrs. George W. Mundy, Lieutenant General Mundy, USAF, Commandant; and Lt. Gen. and Mrs. Verne J. McCaul, USMC.

**STUDENTS** of the Class of '59 at the Industrial College of the Armed Forces and their wives were welcomed 13 September at a reception given by the Commandant of the College, Lt. Gen. and Mrs. George W. Mundy, USAF, at Ft. McNair.

Members of the student body and the staff and faculty of the College and their wives and guests were among the more than 400 who attended. Music was provided by an orchestra composed of members from the Marine Corps Band.

This reception is an annual affair and serves as the "calls made and returned" occasion between the Commandant and the students of the new class.

General and Mrs. Nathan F. Twining, USAF, Chairman of the Joint Chiefs of Staff, headed the guests of the College for this gala occasion. The other distinguished guests included: Admiral and Mrs. Arleigh A. Burke, Chief of Naval Operations; General and Mrs. Lyman L. Lemnitzer, Army Vice Chief of Staff; Lt. Gen. and Mrs. Emmett O'Donnell, jr., Deputy Chief of Staff for Personnel of the Air Force, and Lt. Gen. and Mrs. Verne J. McCaul, Assistant Commandant of the Marine Corps.

Also representing the College Staff and Fort McNair in the receiving line, in addition to the Commandant and Mrs. Mundy, were: RAdm. and Mrs. Sherman R. Clark, Navy Deputy Commandant of the College and head of its Resident Division; Brig. Gen. and Mrs. Kenneth F. Zitzman, Army Deputy Commandant of the College and head of its Extension Division; Col. and Mrs. George C. Duehring, McNair Post Commander; and Col. and Mrs. George Kumpe, Executive Officer of the College.

The College, operated under the supervision of the Joint Chiefs of Staff, conducts a 10 months course in the study of economics of national security and national defense readiness. The student body is made up of senior officers from all the Services and key civilians from those agencies of government having official interests in national security matters.

## Infantry School Wives Greet New Members

The Officers' Wives of the Army Infantry School at Ft. Benning, Ga., opened their fall social season last week with a luncheon at which the hostesses were ladies of the Secretary's Office. They were Mesdames Elmer Johnson, Jr., Chairman, John J. Pavick, William S. Terrell, George G. Hines, Carl W. Kueffer, Donald E. Stewart, J. W. Bernier, George D. Klie and John C. Betterman.

Mrs. James L. Osgard was presented a silver "Follow Me" charm by Mrs. Stanley R. Larsen as a farewell memento from the group. Colonel Osgard, former-

ly Secretary of The Infantry School has been reassigned to another group at Ft. Benning.

New members and guests were introduced to the group by Mrs. Pavick. New members welcomed were Mesdames Francis X. Bradley, James H. Hayes, John B. Holt, jr., Sanford H. Winston, William D. Brown, Gerald W. Smith and Carl W. Keuffer.

Mesdames Kelly C. Turner, Thomas Fell, Thomas B. Earle, Arthur F. Haney, Robert R. Peabody and Miss Madeline Hall were guests.

**HEAD McCLELLAN CLUB**—Following the annual election of officers, this group of ladies was selected to take over the reigns of the Fort McClellan, Ala. Officers Wives Club. Seated left to right they include Mrs. Robert Adams, corresponding secretary; Mrs. Ralph Turner, recording secretary; Mrs. Audie Umphers, treasurer; Mrs. Major Rhodes, jr., president; Mrs. Arnold Raugust, second vice-president, and Mrs. Leland Anderson, first vice-president. Standing are: Mrs. Lon H. Smith, wife of the post commander, and Mrs. John M. Palmer, wife of the commander of the Chemical Corps Training Command, both of whom are honorary presidents.

## District Court Denies Right To Court-Martial Families Overseas; Supreme Court May Hear

The United States District Court for the Southern District of West Virginia has taken sharp issue with the U. S. Court of Military Appeals on the right of the Military Services to court-martial civilian dependents of military personnel overseas.

Disputing the Military Appeals Court's decision in the case of Joanna S. Dial (THE JOURNAL 30 August), the District Court ruled that families of military personnel overseas cannot be tried by court-martial for any offenses.

The District Court decision in the case of U. S. ex rel Alberta Singleton v. Kinsella, granted a writ of habeas corpus to free Mrs. Dial from the sentence imposed by her court-martial.

An appeal to the Supreme Court on the District Court decision is planned by the Government.

Both the Court of Military Appeals and The Supreme Court had previously asserted that the Military Services had no right to court-martial dependents for capital offenses. However, in its recent Dial decision, the Military Appeals Court

said that dependents might be court-martialed for less serious charges than capital offenses.

In the Singleton decision, dated 8 September, the District Court asserted that it could see no logical distinction between capital and non-capital offenses which would give the Services a right to court-martial dependents overseas.

The District Court's decision was based upon the decision of the Supreme Court in the Reid v. Covert case, where a majority of the Court held that civilian dependents could not be court-martialed for capital offenses. Only four justices in the Covert case held that the Armed Forces were without authority to court-martial dependents for any offenses.

In the Dial case, Mrs. Dial and her husband, Specialist Second Class James W. Dial, were convicted by general court-martial of involuntary manslaughter in causing the death of their one-year-old son.

The decision had been affirmed both by an Army board of review and the U. S. Court of Military Appeals.

**WELCOMED TO POPE**—Mrs. T. G. Kershaw, (3d from left) wife of Brig. Gen. T. G. Kershaw, Commander, 464th Troop Carrier Wing, chats with a group of newly arrived Air Force NCO wives during the Welcome Coffee Hour held by the General's wife at the Pope AFB Service Club.

## Items Of Interest For Service Families

Mrs. Amel Cox, wife of Lieutenant Colonel Cox, G-1 for the Second Infantry Division, Ft. Benning, Ga., has been named Red Cross Vice President at that post. She had been active as a Gray Lady at the 10th Field Hospital, Wuerzburg, Germany.

Lt. Col. Q. F. Marterelli, 4520th Wing Director of Personnel, has named Wayne G. Clark, former Executive Director of the Las Vegas, Nev., Community Chest, to be Base Director of Family Services at Nellis AFB, Nev.

Col. Jerry M. Sage, Class Supervisor of the Army Command and General Staff College, Ft. Leavenworth, Kans., recently gave the enlistment oath in the Army Reserve to his son, PFC Jerome Michael Sage, jr., prior to the lad's departure for Columbia Preparatory School, Washington, D. C., where he will be studying for the West Point Entrance Examination in March. Colonel Sage swore him in on the 20th anniversary of his being commissioned a second lieutenant after graduation from Washington State College.

Ten Ft. Lee, Va., women here received Gray Lady service stripes for over 55 hours of service during the past year, from Mrs. Alfred B. Denniston, wife of the Commanding General, herself a long-time Red Cross worker.

Honored were Mesdames Alva D. Brown, Roy Linder, William Crowell, Norman Kistler, George Quinn, Charles L. Siegel, James Sterling, C. J. Stuart, William Waddell and Keith Sherman.

Mrs. George C. West is the new chairman of the Gray Lady service at Lee.

Mrs. Marshall Stubbs, wife of Major General Stubbs, USA, the new Chief Chemical Officer, is arriving in Washing-

ton this week. General and Mrs. Stubbs, whose last post was Ft. Bragg, N. C., have taken an apartment at River House, Army-Navy Drive, Arlington, Va., and expect to be joined there during the Christmas holidays by members of their family, including their son-in-law and daughter, Lt. and Mrs. Duncan P. Smyly, USAF.

The Ft. Benning, Ga., PTA, whose President is Col. Lloyd B. Ramsey, USA, had more than 900 parents at its opening meeting to hear a report on school problems from Brig. Gen. John F. Rugles, Deputy CG of the Army Infantry Center.

Work has started at Vicenza, Italy on a two billion lire Commodity Housing Site, which will provide lodging for approximately 400 U. S. military families.

Spades wielded by Vicenza Prefect, Dr. Gino Palutan; Mayor Antonio Dal Saes; Italian Army Padova Engineer District Commander, Brig. Gen. Nicola Pietravalli; and Commanding General of the Southern European Task Force, Maj. Gen. Harvey H. Fischer, simultaneously turned the first earth on the 87 acre project.

Seymour Johnson AFB, N. C., reports that the first 428 units of Capehart Housing have been given the acceptance tag by the Air Force officials, FHA and Coble-Teer-Weaver Construction Company, Greensboro, contractors for the 1500 units at the TAC Base.

Sitting on 350 acres of Air Force land near Adamsville entrance to the base, the 1500 duplex units will relieve some of the housing problems service personnel have faced since assigned to Seymour Johnson, home of the Fourth Tactical Fighter Wing, commanded by Col. Timothy F. O'Keefe.

## NEW WAC LIEUTENANT IS NUMBER 11

Newly commissioned a second lieutenant in the WAC at the Army Chemical Center, Md., is Dorothy "Dody" Fellenz—the 11th member of her family in government service.

Her father, Col. Lloyd E. Fellenz, USMA '34, Commander of the Army's Chemical Warfare Laboratories, administered the oath.

Colonel Lloyd Fellenz's brother, Col. Walter J. Fellenz is assigned to Fort Bragg, N. C.

Brig. Gen. J. L. Throckmorton, uncle of the new WAC lieutenant, is Commandant of cadets at U. S. Military Academy. Another uncle, Lt. Col. E. F. Higgins, is on active duty as an advisor to the National Guard in Hartford, Conn.

Lt. Alex Burke, a cousin, is serving with the Air Force's Strategic Air Command in Nebraska. Another cousin, Thomas B. Throckmorton, is a cadet at West Point. PFC Joseph Gatti, another cousin, is on duty at Ft. Totten, N. Y.

Another uncle, H. R. Fellenz, is a retired Army captain, residing at Niagara Falls, N. Y. Robert A. Fellenz, the new lieutenant's grandfather, retired from the Army with more than 38 years active duty.

Dody's 19-year-old sister, Genie, a student at the College of New Rochelle, N. Y., works in the summers as a government clerk at Army Chemical Center.

Sister Genie soon will finish college. A younger sister, Andrea, is a teenager. There are three younger brothers: Dennis, a high school senior; six-grader Lloyd, jr.; and the family's youngest, Johnny, a first grader.

## Gray Ladies Capped At Tinker AFB

The Tinker AFB, Okla. chapel was the scene 11 September when seven officer and NCO wives were capped with the Gray Ladies nurses cap.

Participating in the ceremony were members of the Oklahoma County chapter of the American Red Cross. Maj. Gen. Thomas P. Gerrity, Oklahoma City Air Materiel Area commander, and Col. H. T. Clough, Commander of the base hospital, made congratulatory remarks, and Mr. A. J. Carey, Base Field Director for the Red Cross, gave a brief history of the Gray Ladies.

The actual capping was performed by Mrs. C. Wayne Stephens, Gray Lady chairman of the Oklahoma County chapter of the Red Cross, who presented the pins. She was assisted by Mrs. F. B. Bos-trom, 486 Staff Loop, Tinker Gray Lady unit chairman, who presented the cer-

tificates and Capt. Lorine Cochran, Acting Chief Nurse at the base hospital, who presented the caps.

Mrs. William R. Arnold, Tinker Officers Wives Club President and a Gray Lady herself, was toastmistress for the ceremony, which was open to the public. Mrs. Audraine Howard, Assistant manager of the Oklahoma County chapter of the Red Cross, also attended.

The following volunteers, having met the requirements for certification as Red Cross Gray Ladies, were capped:

Mesdames A. J. Atkins, R. L. Chavez, Billie Capello, V. D. Flynn, Jean Hoh, R. D. Kobel, and J. C. Selman.

Others who have met the requirements but who were not present for the ceremony are Mesdames L. K. Glass, E. W. Campenhout, and M. E. Wise.

The welcoming address will be made by Mr. Andrew B. Young, President, Chamber of Commerce of Greater Philadelphia, with Lt. Gen. Milton G. Baker, USA-Ret., Superintendent, Valley Forge Military Academy, acting as Master of Ceremonies.

Other speakers include A. T. McNamara, The Quartermaster General, and Mr. William G. Mason, National President, Quartermaster Association.

Mr. Mason also will welcome visitors at the Friday luncheon and will introduce the guest speaker, Maj. Gen. Webster Anderson, USA, Executive Director, Military Clothing and Textile Supply Agency.

## THE JOURNAL TOUCH

In scores of Journal articles on personnel changes in all the Armed Forces, it's the last paragraph that shares equal importance with the first.

It's our practice, as longtime readers know, to include whenever possible mention of a military man's family.

This is consistent with the view of Journal editors that a military man's professional effectiveness depends in large part on the teamwork and morale of his family.

Watch for the last paragraph reference to the wife and children.

It's The Journal touch.

## Depot Club Opens

Philadelphia QM Depot—More than 100 members of the Military Clothing and Textile Supply Agency attended a luncheon marking the opening of the Club's Fall season when Maj. Gen. Webster Anderson, USA, Depot Commander, welcomed the members.

**GLOBAL TAC**—Maj. Gen. Chester E. McCarty, (left), 12th Air Force Commander, discusses operations with Brig. Gen. Avellin Tacon, just before the latter's deployment to the Far East as commander of Tactical Air Command's composite air strike force. General Tacon was formerly commander of Foster AFB, Victoria, Tex. The strike force, made up of supersonic North American F-100 Supersabres from Cannon AFB, N. M., and Lockheed C-130 Hercules turboprop transports from TAC bases in Ardmore, Okla. and Smyrna, Tenn., is now augmenting Pacific Air Forces.

## Forbes and Little Rock To Start "Project Pup"

New aircraft commanders for the Strategic Air Command will be drawn from pilots in operational units, in a move to develop commander potential now existing among SAC pilots.

"Project Pup," (pilot upgrade program) designed to train B-47 pilots for aircraft commander billets, will soon be in full operation at Forbes AFB, Kans., and Little Rock AFB, Ark.

The project will later be developed to include the B-52 force.

Under the program, each B-47 unit will be able to train a pilot for the aircraft commander job at the rate of one every five or six weeks.

"Pup" requires that each new crew entering McConnell AFB's academic phase consist of two pilots and a navigator. When the course is completed, one of the new pilots will proceed either to Forbes AFB or Little Rock for flying training, and later assignment to an operational SAC unit.

At that point the SAC potential commander will join the remaining pilot-navigator team to go through flying training as a complete crew.

## Ready SAC For Eglin

Eleven contracts for about \$5 million have been awarded for construction of facilities at Eglin AFB, Fla., for the Strategic Air Command dispersal area.

Eglin is one of a number of Air Force bases that will support SAC units under a program calling for the increased dispersal of the nation's bomber force.

Eglin is the home of the Air Proving Ground Center of the Air Research and Development Command.

## NORTH AMERICAN SABRELINER MAKES ITS DEBUT

The twin-jet North American Sabreliner utility trainer, headed for Air Force service, has made its first flight at Palmdale, Calif.

At the controls were North American test pilots J. O. Roberts and Gage Mace.

Although capable of carrying as many as ten persons on cross-country flights, the Sabreliner is smaller than a North American F-100 Super Sabre and weighs only 15,330 pounds.

According to Mr. Raymond H. Rice, Vice President and General Manager of North American's Los Angeles Division, the new plane, in addition to its capabilities as a trainer, is designed to support military operations by providing fast transportation of high priority spare parts or key maintenance personnel for grounded combat aircraft.

The Sabreliner, equipped with General Electric J-85 turbojet engines, can cruise at 500 miles an hour and fly across the US with a single refueling stop. It can cruise at 45,000 feet, with the cockpit and cabin pressurized at 8,000 feet.

The Sabreliner, designed and manufactured at North American expense, is 43 feet long, 16 feet high and has a swept wing span of 42 feet.

## Marine Maj. Cook Joins Army Board

Maj. Bertram E. Cook, Jr., USMC, has been assigned to the Army Air Defense Board, Ft. Bliss, Tex., as Marine Corps Liaison Officer. He replaces Lt. Col. William J. Zaro, USMC, a student at the Senior School, Marine Corps Education Center, Quantico, Va.

Major Cook's family accompanied him and resides at 5212 Marcillus Avenue, El Paso.

## Capt. Preciado Saluted For Fuel-Less Landing

Capt. Robert A. Preciado of the 436th Tactical Fighter Squadron has received the "Crew of the Month" award at George AFB, Calif. for bringing home his F-100 Supersabre during a malfunction in the fuel system.

He was on a local tactics mission when his wingman noticed fuel streaming from the aircraft. The captain noticed his fuel gauge reading 3,900 lbs. and immediately climbed to 37,000 feet heading for George.

He arrived over the base with 1,800 lbs of fuel remaining. A normal traffic pattern was made with 11,000 lbs. of fuel on the initial.

Fuel continued to stream and the engine was shut down on the landing roll with 600 lbs of fuel remaining.

## Obituaries

### Mrs. Vida O. Lester

Burial services were held 17 September at the National Cemetery, Presidio of San Francisco, Calif., for Mrs. Vida O. Lester, wife of Col. Graham W. Lester, USA-Ret., of 2530 Francisco St., San Francisco 23, who died in her sleep at the family home 12 September.

Mrs. Lester was a second generation Californian, her grandparents having been among the pioneers to California in the early 1850's. She and Colonel Lester had celebrated their 40th wedding anniversary this year on 8 September.

In addition to her husband, she is survived by one daughter, who resides at the family home; two sons, Mr. G. W. Lester, Jr., Santa Paula, Calif., and Mr. Lee Lester of Daly City, Calif., and four grandsons.

### Col. John Sedgwick Pratt, USA-Ret

Services were held recently at the Post Chapel, Presidio of San Francisco for Col. John Sedgwick Pratt, USA-Ret, 75, who died 22 August at San Francisco. Interment was at the Presidio National Cemetery.

Born at Ft. Monroe, Va., the son of General Sedgwick Pratt, USA, and the grandson of the first General Sedgwick Pratt, Colonel Pratt was graduated from the U. S. Military Academy with the Class of 1906, and received his commission in the Coast Artillery Corps. During WWI, he served as Ordnance Officer with the 40th Division and with the VI Corps, AEF. Colonel Pratt was a graduate of the Regular and Advanced Courses of the Coast Artillery School, of the Command and General Staff College and the Army War College, serving later as an instructor at the latter two. At the time of the attack on Pearl Harbor, Colonel Pratt was stationed at Honolulu. Retired in October 1942, he was recalled to active duty and served until his final retirement in February 1944.

Following his retirement, he married Mrs. Alice B. Van Fleet, who resides at 2230 Washington St., San Francisco. He is also survived by two daughters by a former marriage, Mrs. Edward Jones of Falls Church, Va., and Mrs. Donald Rattan of Ft. Leavenworth, Kans.; three grandchildren; one sister, Mrs. Frank W. Coe, widow of a former Chief of Coast Artillery; his cousin, Maj. Gen. H. Conger Pratt, USAF-Ret., Washington, D. C.; and three stepchildren, Mrs. Frances Gray, San Francisco, Mrs. Louise Musto, San Mateo, Calif., and Alan C. Van Fleet, Seattle.

## TEACHER-PILOT-JUMPER

First Lt. Myron Ocean, an elementary school teacher and a pilot with the 459th Troop Carrier Wing at Andrews AFB, has become a qualified paratrooper.

Lieutenant Ocean volunteered for the Army's basic Paratrooper School at Fort Benning, Ga. Entering the school in July, Lieutenant Ocean suffered torn ligaments in his foot after a practice jump from a 250-foot tower.

At the end of August, after the injured foot had been in a cast, doctors said Lieutenant Ocean could resume the course. The determined lieutenant completed the remaining qualifying jumps from the tower and five exits from a C-119 to win his jump wings.

## Army Scientist Sees Self-Sufficient Nuclear Research Village In Antarctica

The Antarctic is envisioned by Dr. Paul A. Siple as becoming the self-sufficient center of atomic research and a vast research laboratory for industry.

Doctor Siple, Director of the Army's Research and Development Environmental Branch, told members of the National Security Industrial Association who attended a luncheon last week at the Mayflower Hotel, Washington, D. C., that the area could well become "the Mediterranean of the future."

"If we assume that the Atomic Age is here to stay," he said, "we must remember that there is much about this remarkable source of energy that is alien to life. In fact, it can be lethal to all forms of plants and animals."

### "Buck Rodgers Age"

"In the long run, we can't trust to the fool-proofness of man to prevent accidents that could be disastrous. The manufacturing of atomic energy will have to be carried on in a safe place where there is a minimum of consequential life and where the waste products can be stored for millenniums. Fortunately, Antarc-

tica exists to fulfill this need."

Atomic energy, the Antarctic explorer said, will go a long way toward solving the greatest deficiency in the Polar regions—power, heat and water, "and one can visualize a civilization living in a Buck Rodgers age existing in a plastic box."

One of the problems to be solved, he told his audience, is development of scientific techniques which will permit man to make use of the four "basic building blocks which are abundant in the Antarctica."

He revealed that he is working on "Project COHN" which has as its aim rearrangement of the four common elements—carbon, oxygen, hydrogen and nitrogen—to provide those at the South Pole with their basic expendable requirements, food, fuel, power and clothing, and some construction materials, such as plastic and cellulose products.

"There are endless combinations of organic components," he stressed, "which can be made from these four building blocks when man learns how to put them together at will—Antarctic is rich in these four elements with ample supplies

of coal as one source of carbon. Thus, in due time, Antarctica could and certainly will be independent of the products it now must import almost totally.

"In the future, the sea water with its rich marine life could provide the additional elements Antarctica's population would require, even if richer mineral and food sources are not discovered."

### Weather Research Center

Doctor Siple predicted that Antarctica will become the center of weather bureau operations in the future.

As a satellite tracking station, he said, Antarctica could relay weather information every hour of the day. A seeing-eye weather satellite, traveling from North to South, he noted, offers more frequent readings than one placed in any other orbit. Antarctic is better suited for this purpose than the North Pole, he explained, because the North Pole is on a constantly moving ice-pack which drifts and turns. On the other hand, Antarctica is on solid snow covered land at an elevation of 9,200 feet.

He called upon his audience not to underestimate the earth's polar regions for future scientific, military or civil use. "One of these days," he said, "the polar regions will pay off."

## Industry-Defense Team Action

Rheem Manufacturing Co.'s new, completely ground-controlled surveillance drone has passed its first successful test flights at the Army Flight Test Station, Yuma, Ariz. Launched from a truck, the drone is recoverable by parachute.

Hughes Aircraft Co., Tucson, Ariz., has saved over \$10,000 in the last six months by using the Baldwin-Lima-Hamilton Corp.'s Aircraft Missile Weight and Balancing System in testing Falcon Guided Missiles as they leave the production line. The device determines with high accuracy the center of gravity and thrust alignment of the missile.

Northrop Aviation has received and is testing the first new lightweight General Electric J-85 turbojet engines which will power the USAF-Northrop T-38 supersonic trainer.

Repub Aviation Corp., Farmingdale, L. I., has demonstrated the two-seater Djinn (pronounced gin) jet helicopter, capable of speeds up to 81 miles an hour with extreme maneuverability. Designed by Sud Aviation of France, the helicopter can rise at the rate of 6,000 feet per minute. Because the Djinn has no electrical system or transmission, Republic said, field maintenance problems are nil and it requires no inspection or maintenance other than pre-flight "walk-around" checks and minor lubrication up to 300 hours. It set the world altitude record for all classes of helicopters in 1957, when it climbed to 27,860 feet. (The Alouette topped this earlier this year when it climbed to 36,501 feet.)

Analytic Services Inc. has been formed in Alexandria, Va., to work on research related to National Security. Initially, it will work principally on weapons system planning for the Air Force Director of Development Planning. President of the firm is Dr. Stanley J. Lawwill.

B-52 RADAR. New radar equipment for the B-52 bomber boosting its protective coverage from all angles will soon roll from the General Electric Company's Light Military Electronics Division (LMED), Utica, N. Y.

The new "black box" developed by the GE division under sponsorship of the Air Research and Development Command (ARDC), is a forward surveillance radar known as the AN/APS-81.

A \$5-million contract was awarded the firm for production of the new radar. Providing complete coverage for the B-52, the forward surveillance radar integrates with other electronic systems in feeding data to a common display indicator (scope watched by an operator in a B-52). Aided by automatic warning features, the operator can start maximum protective measures if under attack.

ATLAS ICBM—Tiny, pie-shaped silicon solar cells, manufactured fingernail thin by Hoffman Electronics Corporation, are helping guide the Atlas missile developed by Convair (Astronautics) Division, General Dynamics Corporation.

The cells are one of three Hoffman-made products being utilized in the Atlas intercontinental ballistic missile program. Executive Vice President M. E. Paradise of the Hoffman Semiconductor Division, Evanston, Ill., reports.

#### APPOINTMENTS

John R. Burwell, USNA '41, has been appointed Vice President for sales of Olin Aluminum of the Olin Mathieson Corporation. He ended his second tour of duty in 1953, with the rank of commander.

Fred. H. Lutter has been named European Representative for the Remington Rand Univac Tabulating Division, federal government operations. He will work with U. S. officials at military and governmental installations in Europe.

## Col. Kennedy, Hotel President, Named Civilian Aide; Others "Keep Busy"

Col. Clement E. Kennedy, USA-Ret., President and General Manager of the New Ocean House, a Swampscott, Mass., hotel, this week was named Civilian Aide to Secretary of the Army Wilber M. Brucker for Massachusetts. He enlisted in 1917, was separated in 1919 as a first lieutenant, was recalled in 1941 and separated as a colonel in the Quartermaster Corps in 1946.

Colonel Kennedy is a graduate of Worcester Academy and Harvard University. He holds honorary degrees from Bryant College and Staley College.

Lt. Col. Ivan Sattlem, USA-Ret., USMA '40, has been appointed Assistant Vice President and Director of the International Telephone and Telegraph Laboratories, Nutley, N. J. He was formerly an officer of the Federal Telecommunications Laboratories which has been consolidated with the research units of two other ITT units, Farnsworth Electronics Company and Kellogg Switchboard and Supply Company, to form the new unit.

Lt. Col. Keith M. Rice, USA-Ret., will continue in his former post of Supply officer for the Surgical Research Unit at Brooke Army Medical Center, Ft. Sam Houston, Tex., in Civil Service status. He resides at 231 Abiso Ave., San Antonio.

M/Sgt. John W. Zeigler, USAF-Ret., former non-commissioned officer in charge of the Ramey AFB, P. R., fire department, has been sworn into the Civil Service as Assistant Ramey Fire Chief.

Capt. Lewis A. Rupp, USN-Ret., has been named Vice President and General Manager of Ionics Inc., 152 Sixth Street, Cambridge, Mass., developer and manufacturer of electric membrane plants for water desalting and other industrial applications. A '37 USNA graduate, with distinction, Captain Rupp holds a Master of Science degree from Massachusetts Institute of Technology and was, prior

to retirement, Design Superintendent at the Portsmouth, N. H., Naval Shipyard in charge of submarine design. He played a key role in work on the USS Sailfish and USS Salmon, first submarines designed specifically for radar picket duties.

HONOR RETIRED MEDIC—Col. Norman H. Wiley (left), Army Medical Corps (Ret.) receives the Legion of Merit (First Oak Leaf Cluster) from Maj. Gen. H. J. Vander Heide, Commanding General, XXI U. S. Army Corps (Reserve). Mrs. Wiley and their daughter, Valerie were also present for the ceremony at Indiantown Gap Military Reservation, Pa. Col. Wiley, now Medical Director of the Samuel G. Dixon State Hospital, South Mountain, Pa., was honored for "exceptionally meritorious conduct in the performance of outstanding services," while he was on active duty.

## INDUSTRY IN DEFENSE

**LARGEST AIRCRAFT** to go into the U. S. Army's aviation inventory will be this de Havilland DHC4 Caribou, which can take off and land on improved military landing strips only 850 feet long. The first of five test Caribou's for the Army are scheduled for delivery in February. With a gross weight of 12 tons, its payload will vary from 6,038 to 7,383 pounds for distances of from 200 to 600 miles. Its cruising speed will be 183 miles per hour. First official demonstration flight by de Havilland Aircraft of Canada was made 17 September at the Downsview Airport, Ontario.

### Douglas-AF Speed Cargo Handling

Douglas Aircraft Company, Santa Monica, Calif., and the Air Force have combined to develop new techniques to slash loading time of cargo aircraft to as little as one-twelfth of that now required.

Under contract to the Air Force, Douglas will produce a new standardized cargo handling system which can be used with the C-119, C-123, C-130 and C-133A. A second contract will study the adaption of this system to aircraft with high cargo floors, such as the C-54, C-97, C-118, C-121, C-124, KC-135, DC-8, and the aircraft of the Civil Reserve Air Fleet.

By use of roller conveyors and pallets, the new system is capable of off-loading 90,000 pounds of cargo from a Douglas C-133A Cargomaster and re-loading the same amount in approximately 30 minutes.

The system, according to Douglas officials, reduces cargo handling time to that required for refueling the aircraft.

The initial contract covers design and fabrication of a set of track structures, 53 cargo pallets, and 33 cargo cases. Installed in a C-133A, the complete system will undergo operational suitability tests by the Air Force.

### Beech-Built Target Sets Altitude Record

Beech Aircraft Corporation's Navy KDB-1 target aircraft has flown a new unofficial high altitude record of 43,500 feet for remote-controlled targets in the KD-300 class (medium performance). The new mark exceeds the KDB-1's guaranteed ceiling by 3,500 feet and tops the previous KD-300 record—also set by a KDB-1 last June—by 1,500 feet. Powered by a 120 hp McCulloch engine, the Beech-built recoverable target is undergoing Navy fleet evaluation to test its operational suitability.

Beech missile engineering division field test personnel at the Naval Air Missile Test Center, Point Mugu, Calif., reported that the record flight, made from ground-launch, occurred during a company product improvement program. It came as the result of new refinements to the powerplant, the report stated.

Designed to provide a realistic mark for surface-to-air and air-to-air weapon systems evaluation and training, including missile firing missions, the 600-pound KDB-1 is described as one of the most advanced propeller-driven target vehicles yet developed. It has a high speed of 300 knots at operational altitudes.

### Army Gets O.K. For \$35 Million Awards To Produce M-14 Rifle, M-60 Machine Gun

The Army has gained a Defense Department green light for "quantity production" of the M14 ("Springfield") rifle and M60 machine gun, involving a combined outlay of \$35 million.

The Pentagon said that this production "culminates a development and test program which ultimately will arm U. S. soldiers and Marines with a new family of weapons."

The Springfield rifle and machine gun replace seven of the small arms currently used by Army line units.

The rifle, which fires the new 7.62mm NATO cartridge, replaces the present M1 Garand rifle, the M1 and M2 carbines, the Browning Automatic Rifle (BAR) and the M3 sub-machine gun. It is capable of selective semi-automatic and full-automatic fire.

A total of 70,000 rifles involving ap-

proximately \$20 million has been authorized in the Fiscal Year 1959 budget.

To prepare for mass commercial production of the M14 a pilot line has been established at the Springfield, Mass., Armory with the first production item scheduled to come off the assembly line in June 1959.

The currently authorized pilot line run at the Armory will be 15,600 rifles at a cost of approximately \$3 million.

Additionally, the Army has been authorized to produce from the Fiscal 1959 budget 8,835 M60 machine guns at an approximate cost of \$15 million. Of this amount, 5,835 will be produced commercially, while the remainder will be built at Springfield Armory to provide continuity of pilot line production.

Negotiations with potential contractors will begin shortly.

### NAVY-SPONSORED RAYTHEON FACILITY NEAR AFB

A \$1.7 million flight test facility is being built at Bedford, Mass. for use by the Raytheon Manufacturing Company in speeding development of electronic devices for the Navy's Bureau of Aeronautics.

Believed to be the first military flight facility of its kind in the United States, the 70,000 square foot structure, scheduled for completion by early 1959, will be located at the north end of Hanscom AFB, near Raytheon's missile research and development laboratory.

Raytheon is prime contractor for the Navy's Sparrow III air-to-air guided missile system and also the Army's Hawk surface-to-air missile.

### North American Wins Booster Contract

North American Aviation's Rocketdyne Division has received an Army contract for propulsion units to power a 1,500,000-pounds-thrust liquid propellant booster.

A project of the Army Ballistic Missile Agency, Huntsville, Ala., the unit will consist of a cluster of currently tested rocket motors, capable of placing large payloads in orbit. Main element of the cluster will be a motor similar to that used with the Jupiter, Thor and Atlas Missiles.

This approach to the development of a super booster, Army authorities said, is considered the quickest and least expensive means of obtaining a propulsion system capable of orbiting large payloads.

An alternate approach, that of developing a single motor with similar thrust, is also being followed by North American under contract to the Air Force.

### C. D. Manhart Is V.P. For Government Relations

Charles D. Manhart has been elected to the new position of Vice President, Government Relations for Raytheon Manufacturing Company, it is announced by President Charles F. Adams.

Mr. Manhart has resigned as Director of Military and Government Sales at Bendix Aviation Corporation, where he served for 23 years.

In his new position, he will have full responsibility for strengthening, expanding and coordinating all phases of Raytheon's relationships with the Armed Forces and other government agencies.

**MODEL OF A FLYING RESEARCH VEHICLE** under development by Chrysler Corporation's Defense Operations Division for the Army Transportation Corps. Mr. C. C. Utz, executive engineer for Chrysler's Defense Engineering group, holds the model on its side to show its operating principles. Twin rotors are set within barrel-like ducts to provide lift and thrust for the wingless vehicle. One man controls the entire flight operation. Chrysler received a \$661,000 development contract from the Army in July 1957.

### Grumman Launches Study Under AF Contract

An \$86,000 study contract to determine the basic maneuverability requirements of aircraft which will perform future Air Force missions has been awarded Grumman Aircraft by the Flight Control Laboratory of Wright Air Development Center, Ohio.

The contract calls for detailed "mission analyses" concerning the roles of future interceptor, reconnaissance and strategic bomber aircraft.

Grumman President Leon A. Swirbul said that the results of the study would be "invaluable" to the designers of aircraft which will be operational in the 1960's.

### Industrial College Alumni Form Group

Formation of the Ohio chapter Industrial College of the Armed Forces Association is announced at Wright-Patterson AFB, Dayton, with about 55 alumni in the area.

Both graduates of the Industrial College of the Armed Forces residence school and associates—those who have completed orientation courses or correspondence courses—are eligible for membership.

Officers are Col. J. R. Dyer, president, and John G. P. Callahan, Secretary. Treasurer, Colonel Dyer is Chief, Programs Division, Directorate of Plans and Programs, Headquarters, Air Materiel Command, and Mr. Callahan is in the Operations Office, Director of Laboratories, Wright Air Development Center.

G. H. Gilbertson was named Vice President for the Cleveland-Akron region. Vice presidents for Columbus, Dayton, Cincinnati and Toledo, are to be designated later.

Persons eligible for membership may contact the organization by writing PO Box G, Area A, Wright-Patterson AFB, Ohio.

### New Portable House Can Be Carried In Jeep

A new portable housing unit with pneumatic "walls" that can be inflated in five minutes to form a rigid, self-supporting, load-bearing structure, has been developed by the Burger Brothers Company of New Haven, Conn.

The dome-shaped shelter is supported solely by pneumatic panels of neoprene-coated nylon fabric, less than three inches in width. These are inflated simultaneously, but maintain pressure individually, so that once the unit is erected the air pump can be disconnected and the windows and door kept open or closed depending upon climatic conditions.

It is described as being so light two men can lift it and yet sturdy enough to withstand winds up to 120 miles per hour and snow loads up to 30 pounds per square foot.

When deflated, it can be folded to fit into a jeep or small station wagon. It can also be towed by helicopter, either inflated or deflated, to normally inaccessible areas.

### Space Concentration Seen In GE Shifts

Increasing concentration on missile and space vehicles has resulted in the establishment of a General Electric Company Missile and Space Vehicle Department with headquarters in Philadelphia.

Previously known as the Missile and Ordnance Systems Department, the new unit will no longer have responsibility for the Ordnance Section in Pittsfield, Mass., which becomes a separate operating component of the Defense Electronics Division.

Title of the Ordnance Section now becomes the Ordnance Department.

Edward L. Hulse, head of the Missile and Ordnance Systems Department, will continue as acting General Manager of the Missile and Space Vehicle Department. Gerald A. Hoyt, former Manager of the Ordnance Section, becomes General Manager of the Ordnance Department.

GE Vice-President Dr. George L. Haller is General Manager of the Defense Electronics Division.

Among its major projects, the Missile and Space Vehicle Department is working on ballistic nose cones for the Air Force Atlas and Thor missiles.

Ordnance Department projects include the development of fire control and inertial guidance systems for the Navy's Polaris Fleet Ballistic Missile, and equipment for the Navy's Talos missile.

## Chance Vought Regulus Scores A "First"

The first Regulus II supersonic surface-to-surface missile to be launched from the deck of the submarine USS Grayback was fired 16 September off the coast of California near the Pt. Mugu Naval Air Missile Test Center to a landing about 200 miles distance at Edwards AFB, Calif.

Built by Chance Vought in Dallas, the Regulus II, a second generation of the Regulus I, in operational use for more than two years, was tested from the newly commissioned Grayback "to demonstrate the feasibility of the new weapon system—the joining of the submarine and the more-than-Mach 2 speed aerodynamic missile," an official Pentagon announcement stated.

The Regulus was launched shortly after the submarine surfaced. It flew a prescribed course of approximately 200 miles to Edwards where it was intended that the missile be landed. Upon arrival at the Base, the peacetime recovery gear did not function and the missile made a controlled wheels-up landing (no landing gear) with the result that it caught fire and burned.

The 57-foot missile, mounted on the submarine's swiveling launcher just forward of the conning tower, left the 320-

foot Grayback bathed in a cloud of smoke as it roared skyward under the power of its General Electric turbojet engine and the thrust of its booster rocket.

Shortly after launching the booster rocket automatically disengaged and fell into the ocean.

"The missile was under positive ground and air control in compliance with flight safety directives throughout the operation," the Pentagon reported.

The Grayback, first of a new generation of submarines that will be capable of firing Regulus II, was commissioned at Mare Island Naval Shipyard, Calif., last March. Displacing 3,600 tons, she is one of the Navy's largest conventionally-powered submarines.

Future Regulus II-firing submarines will be nuclear-powered including the USS Halibut, USS Permit, USS Pollack and the USS Plunger.

The Regulus II, which entered the final phase of its test program this summer, is an aerodynamic missile capable of a target accuracy that makes it suitable not only for wide-open targets but also for small, isolated military targets requiring near-direct hits to destroy.

**POLARIS CHIEF INSPECTS MISSILE SUB—** RADM. William F. Raborn, (second from right), director of special projects for the Navy's Bureau of Ordnance, inspects Fleet Ballistic Missile submarine SSB(N) 598 under construction at the Groton, Conn. shipyard of General Dynamics Corporation's Electric Boat Division. With RADM. Raborn are (left to right) Capt. N. G. Ward, who will command the nation's first ballistic missile submarine squadron; RADM. J. M. Farrin, assistant chief of the Bureau of Ships for the FBMs weapons system; Carleton Shugg, Electric Boat Division general manager; and Capt. A. C. Smith, supervisor of shipbuilding at Groton.

## GARRETT DIVISION GETS ZEUS POWER CONTRACT

Development of solid propellant fueled accessory power supply units has been assigned to The Garrett Corporation's AiResearch Manufacturing Division, Los Angeles, by Douglas Aircraft Company for the Army's Nike Zeus missile.

The APU, secondary as a power source only to the missile's main propulsion engine, provides power for the aerial weapon's hydraulic and electrical systems. One of the principal advantages sought in the development of solid propellant units is system simplicity as compared to the complexity of liquid propellant systems. Basically, combustion of APU fuel produces a gas, which, under high pressure, spins a turbine wheel at very high speeds to generate accessory power.

Concurrently with the Zeus development program, AiResearch facilities are turning out the missile and aviation industry's first large-scale production of accessory power units—for the Army's Nike Hercules.

## Western Electric V.P. Gets Army Board Post

The Army has appointed Dr. James W. McRae, President of the Sandia Corporation, Albuquerque, N. Mex., and Vice President of Western Electric Company, as Vice Chairman of the Army Scientific Advisory Panel.

Dr. McRae on 1 October will become a Vice President of the American Telephone and Telegraph Company in charge of coordinating defense activities of the Bell Telephone System.

Dr. McRae, 47, earned his Ph.D. in electrical engineering at California Institute of Technology and has been active in the field of communications since that time. He is a Fellow and past president of the Institute of Radio Engineers and a member of the American Institute of Electrical Engineers and of Sigma Xi.

The position of vice chairman of the Army Scientific Advisory Panel was previously filled by Mr. Richard S. Morse, President of the National Research Corporation, Cambridge, Mass. Mr. Morse is now Chairman of the Army Scientific Advisory Panel.

## USN Opens Technical Documents Office

Construction has been completed on the new Central Technical Documents Office, Naval Ordnance Plant, Louisville, Ky.

Mission of the Office is to serve as the central maintenance, reproduction and distribution activity for ordnance drawings and lists of drawings. Effective 1 October, the CTDO will supplant the U. S. Naval Gun Factory, Washington, D. C., for such services to the Bureau, to the Shore Establishment, to the Fleets, and to contractors and bidders.

RADM. John Quinn, Acting BuOrd Chief, said naval vessels will continue to be serviced by NGF until 31 Dec. 1958, when CTDO also will assume that function.

Requisitions for copies of ordnance drawings (including photoprints, blueprints and vandykes) should be addressed to: Central Technical Documents Office, U. S. Naval Ordnance Plant, Louisville 14, Ky.

## Warren Smith Heads New Fairchild Division

A new Applied Science Division has been formed by the Fairchild Engine and Airplane Corporation. President Richard S. Boutelle has named Mr. Warren R. Smith as General Manager of the Division, which will perform a long-range planning and engineering service for the corporation, as part of the over-all Fairchild planning program being directed by Vice President F. E. Newbold, jr.

Mission of the Applied Science Division is to conduct weapons system and operations research for the government and under contract with Fairchild divisions and to support other Fairchild activities with engineering and scientific development programs through the pooling of technical personnel resources and facilities.

The Division was formed from an operations group of highly skilled engineers and scientists who have worked under Mr. Smith's direction for more than two years. The Applied Science Division is located at 1334 North Henry Street, Alexandria, Va.

Mr. Smith joined Fairchild as Special Assistant to the Vice President of the Aircraft Division in 1946. From 1949 to the present he has been Assistant to the President.

## Col. Westlake Receives Award

Col. William Westlake, recently retired Air Force Information Services officer and former Chicago newsman, has been awarded the Legion of Merit from Deputy Assistant Secretary of the Air Force for Reserve and ROTC Affairs, Benjamin Fridge.

Colonel Westlake was cited for "outstanding service to the United States as Executive Secretary to the Air Force Reserve Policy Committee, Hq, USAF, from 1955 to 1958."

## Gen. McCorkle Will Give Missile Report To Club

Brig. Gen. Charles M. McCorkle, USAF, will speak at a luncheon meeting on the Aero Club of Washington at the National Press Club on 24 September.

Assistant Chief of Staff for Guided Missiles, General McCorkle will discuss "The Air Force and the Missile."

## For Those Who "Need to Know"

The weekly issues of The Journal feature vital stories affecting all members of the Armed Forces and their families.

What's the latest word on Family Medicare? What's the impact of new Comptroller General decisions? How about Pentagon plans to seek changes in restrictive Dual Compensation legislation?

And, as it has done since the first issue on 29 August 1863, The Journal continues week after week a ceaseless editorial campaign to win justice for all members of the Armed Forces—Active and Retired, Regular and Reserve.

Those who "Need to Know" need to be certain they receive The Journal—a personalized G-2—each week.

# Two **NEW** Teletype tape

## TAPE PUNCH

*Teletype Model 28  
Typing Reperforator*

## TAPE READER

*Teletype Model 28  
Transmitter-Distributor*

# units speed work, cut costs

More uniform work loads, greater accuracy, lower cost, faster handling, greater operating efficiency in:

- sales, sales analysis, warehousing, accounting, purchasing, production control, shipping, receiving, manufacturing;
- communications, data processing, automation and paperwork simplification.

These new punched tape units offer you the opportunity of extending your communication and business systems into new departments at a relatively low cost. They can be used individually . . . or in combination with other Teletype equipment . . . or with such business machines as computers, calculators and card punches.

All advanced Teletype Model 28 features—operation at 100 words per minute, handsome styling, compactness, extremely quiet operation, modular design, metal clutches that require oiling only once or twice a year.

**TAPE PUNCH** • The Teletype Model 28 Tape Punch is a receiving unit—for message relaying in communication systems . . . integrating data from several sources into a single tape . . . monitoring . . . by-product tapes.

#### Features and Specifications:

1. Receives incoming sequential signals and translates them into punched code combinations in tape.
2. Types corresponding characters on the tape.
3. Provides facility for parallel-wire output of incoming signals, with simultaneous punching of tape, for control of external equipment.

Speed 100 wpm (or lower speeds where required for compatibility with existing systems). Produces chadless (partially punched) 5-level code

tape,  $\frac{1}{16}$ " wide. Prints on tape. Dimensions, a compact  $9\frac{1}{2}$ " high, 13" wide, and  $14\frac{1}{8}$ " deep.

**TAPE READER** • The Teletype Model 28 Tape Reader is a transmitting unit. When punched tape is fed into the unit, it "reads" the code combinations and automatically sends them to their destination. Serves as a sending unit in communications systems . . . read-out device for business machines . . . control mechanism for automated equipment.

#### Features and Specifications:

1. Translates code in perforated tape into electrical impulses for sequential transmission.
2. Translates code in perforated tape into electrical impulses for parallel-wire transmission.
3. Receives electrical impulses from external parallel-wire source and translates them for sequential transmission.

Operates at 100 wpm (lower if required). Handles chadless or fully punched tape. Dimensions  $6\frac{1}{2}$ " high, 9" wide, 16" deep.

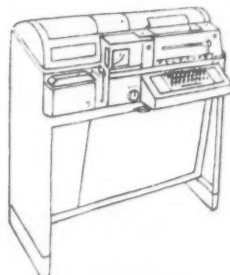

**MORE INFORMATION** • For descriptive literature on the new Punch and Reader—or other units in the Teletype Model 28 line—please write to Teletype Corporation, Dept. 70J, 4100 Fullerton Avenue, Chicago 39, Illinois.

## ATC Will Test New Wing Concept

A test organization based on new technical training wing concepts will be created 1 October at Lowry AFB, Colo.

Features of the streamlined training wing structure to be tried at Lowry include making the wing commander the actual head and commandant of training. Responsibility and authority will be properly assigned at all levels in the

wing to allow for programmed changes in structural organization concurrent with changes in training concept.

Remaining in operation for 60 to 120 days, the Lowry test wing will be studied with an eye to adoption of the new concepts early next year at all technical training bases in the command.

An ATC survey team confirmed the necessity for stabilizing key military assignments and unit manning documents for this type wing. It was also recommended that technical training wings be redesignated as technical training centers.

This recommendation will go Headquarters USAF for approval.

## Lt. Col. Styger Gets Squadron

Lt. Col. Joseph C. Styger has arrived at Francis E. Warren AFB, Wyo., to command the new 389th Transportation Squadron. He was Assistant Inspector General at Air Force ROTC Headquarters, Maxwell AFB, Ala.

Accompanying him to Cheyenne are his wife, Doris, and their three children.

## Col. Duncan Robins Chief

Col. Earl D. Duncan has assumed duties as Robins AFB, Ga., Commander. He succeeds Col. J. Scott Peddie, who will remain at Robins in his new position as WRAMA Inspector General.

**TEN DAYS IN SOLITARY**—Senior Master Sergeant Samuel G. Karst, left, and Dr. Bruno Balke, of the Air Force School of Aviation Medicine, check over their pressure-suit equipment as they prepare for a ten-day stay in a sealed altitude chamber at Randolph Air Force Base, Texas. They will collect data for use in the selection and training of future spacemen.

## From Space To AFA

Senior Master Sergeant Samuel G. Karst is keeping himself in shape to represent the Air University at the Air Force Association Convention in Dallas this month by eating ababy food on a ten-day simulated trip to space.

Part of an endurance test in which he and Dr. Bruno Balke are testing their mental and physical reactions at extreme altitudes and climatic conditions, the baby-food diet is supplemented by water, fruit juices, instant coffee, soup, and a nut cake baked by Mrs. Balke.

The two entered their space cabin at the School of Aviation Medicine, Randolph AFB, Tex., on 12 September. Barring an emergency, they will not emerge until 22 September—just three days before the beginning of the AFA meet in Dallas.

Senior Master Sergeant Ledley B. Symmes, Jr., of the Warner Robins Air Materiel Area, Ga., has been chosen to represent the Air Materiel Command at the Air Force Association Convention in Dallas 25-28 September.

The much decorated airman, a navigator during WW II, was chosen on the basis of his record in two wars, the Berlin airlift and outstanding performance in his present assignment as Sergeant Major of Robins AFB, Ga.

## WIN AF MEDALS

The Air Force announces in General Orders Number 50 the following awards of the Legion of Merit, DFC, Air Medal, and Commendation Medal:

### LEGION OF MERIT

Davis, Brig Gen W A Pickoff, Col Julius Beall, Col L S Telzrow, Col T E Dickerson, Col R W Andrews, Col R L Lewis, Col L G Favorite, Maj W B O'Neill, Col F M Jeancon, Capt W Patteson, Col H O
